Overview

Matrix.	146
-----------------	-----

Our professional WIFI weather centers cater to the needs of enthusiastic amateur meteorologists, offering a comprehensive range of features. Equipped with precise 7-in-1 sensors and useful functionalities, these centers provide detailed insights into weather conditions. The standout feature is our models with dynamic displays, ideal for in-depth weather analysis.

Moreover, with the WIFI function, your data can be swiftly accessed online through weather platforms like WeatherUnderground, allowing you and others to stay updated with lightning speed.

PROFESSIONAL WIFI WEATHER CENTER

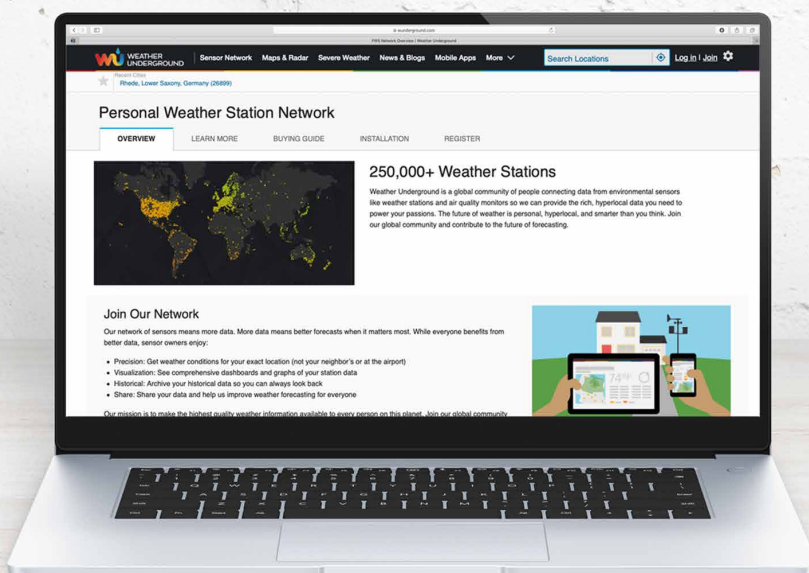

Expand your horizon

Your personal weather data anytime, anywhere

In today's interconnected world, it's evident that everything is linked, including our interactions with wind and weather. Given how much these elements influence our daily lives, it's prudent to embrace the internet for weather-related purposes as well. Depending on the weather station you choose, you'll find support for popular platforms such as ProweatherLive, Weather Underground, Weathercloud, AWEKAS, and PWS. Have a different favorite site? No problem - you can connect your weather center to it too.

This connectivity enables you to access the local measurement data of your WIFI weather center from anywhere in the world. Suppose you're basking in the sun on holiday, yet you can't shake off concerns about your carefully tended garden. By swiftly checking the weather situation online, you can take proactive measures or enlist the help of neighbors or friends to ensure your garden stays healthy.

And if your home is equipped with smart technology, such as a Smart Home system, you can take things a step further by integrating your weather data with it. Platforms like AWEKAS allow you to directly transfer measurement data - such as temperature, humidity, wind strength, and precipitation - to your smart home control system. Imagine your lawn sprinkler automatically activating when before your lawn dries up, or returning home after work to find your living space at the perfect temperature for relaxation. With this level of integration, you can truly enjoy the benefits of a seamlessly connected environment.

The smart handling of the weather

In today's digital age, social media platforms like Facebook, Instagram, and others have made sharing a common practice. With WIFI connectivity, you can extend this sharing culture to your weather data by publishing it on specialized platforms such as Weather Underground and Weather Cloud. Accessing your data is convenient - simply use the respective app on your smart device, from anywhere in the world.

For those who own smart homes, many of the online portals offer an additional advantage: You can seamlessly transfer the measured values from your multi-sensor, including temperature, humidity, and more, directly to your smart home controller. Furthermore, you have the option to integrate other wireless sensors, such as floor sensors or pool thermometers, into your system, enhancing the versatility and functionality of your smart home setup.

Art. No. 7003510

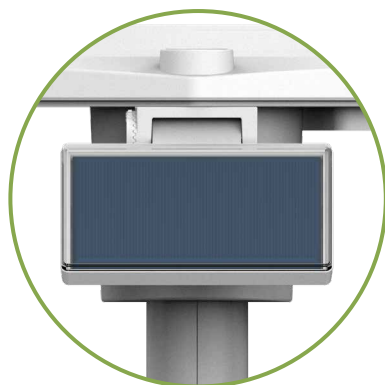

MeteoChamp 7-in-1 HD WIFI Weather Center with various display modes

Keep track of changes in the weather: the measurements from the 7-in-1 solar-powered and thermo-hygro sensor can be viewed on the HD TFT display in various display modes.

Art. No. 7003510

Solar panel

The multi-sensor has a large solar panel that supplies the sensor with power using the sun.

Key Features

- › Weather station with 17,8 cm HD TFT display and various display options, such as detailed display, table or graph
- › Measures temperature and humidity (indoor/outdoor), wind direction/speed, amount of precipitation, light intensity, UV level, air pressure
- › WIFI transmission to weather portals with app; historical data with export
- › Temperature and humidity can be measured in two indoor spaces
- › Up to 7 sensors can be connected, including pool or soil sensor (not included)
- › Many additional features, such as Beaufort value, Hi/Lo alarm, perceived temperature

Colour display with various display modes

Get the weather views you need at the touch of a button: the home screen with the basic data and reliable weather forecast, the detailed display with even more information including high-low values and trends or the overview page on temperature and air pressure.

Two different colour schemes

Switch between the two colour schemes "Midnight Blue" and "Pearl White."

Thermo-/Hygrometer
Power plug

8-in-1 MeteoTemp JW WIFI Weather Center

The large display of the weather station with multi-sensor and handy features like a heat stress index provides plenty of room for all kinds of weather data.

Art. No. 7004406

Key Features

- › Weather station with well-structured 10" display
- › Temperature, humidity (indoor/outdoor), wind speed, wind direction, precipitation, UV index, light intensity, air pressure
- › Wet-bulb globe temperature with heat stress index
- › WIFI transmission of data to online weather portals
- › Weather forecast, weather alerts, and high/low alarm
- › Max./min. value memory and history memory (hourly for 24 hours)

Scope of delivery

Base station
7-in-1 solar outdoor sensor
Power plug

Professional 7-in-1 WIFI Weather Center with light intensity and UV Measurement

The weather station impresses with a wide range of features and measurement values on the stylish colour display or in a web browser, which can be accessed anytime and anywhere.

Art. No. WSX3001CM3LC2

Key Features

- › Wireless weather station with 7-in-1 outdoor sensor and WIFI function for data publication
- › Measures temperature, wind speed/direction, humidity/pressure, amount of precipitation, light intensity, UV level
- › Comprehensive display of measurement and history data
- › Possibility to transmit WIFI to AWEKAS, Weather Underground and WeatherCloud
- › Wake/alarm function including ice warning; automatic time and date setting

Scope of delivery

Base station
7-in-1 solar outdoor sensor
Thermo-/Hygrometer
Power plug

WIFI Gateway El Nino for 5-in-1 and 7-in-1 Sensor

Update your previously bought BRESSER 5-in-1 or 7-in-1 sensor with this WIFI gateway making your existing weather center a broadcasting station to the world wide web.

Art. No. 7002610

Key Features

- › WIFI gateway for uploading local weather sensor data to online platforms
- › Designed to work with one or more weather sensors (not included)
- › Enables sharing weather data on ProWeatherLive (including 3-year membership), Weather Underground, Weathercloud, and one additional platform
- › Autonomously measures indoor temperature, humidity, air pressure
- › Easy configuration and updates via the WSLink app
- › Compatible with a wide range of optional sensors

Scope of delivery

WIFI gateway
USB cable

WIFI Gateway El Nino with 7-in-1 Professional-Sensor

Advanced Weather Insight: Easily publish extensive data on weather platforms using this modern WIFI gateway and multi-sensor.

Art. No. 7002620

Key Features

- › WIFI gateway with multi-sensor for uploading local weather data to online platforms
- › Enables sharing weather data on ProWeatherLive (including 3-year membership), Weather Underground, Weathercloud, and one additional platform
- › The gateway autonomously measures indoor temperature, humidity, and air pressure
- › The 7-in-1 sensor measures outdoor temperature, humidity, wind speed, wind direction, precipitation, UV level, and light intensity
- › Simple setup and updates via the WSLink app
- › Compatible with a wide range of optional sensors (not included)

Scope of delivery

Outdoor 7-in-1 sensor
WIFI gateway
USB cable

Our modern and stylish colour WIFI weather centers seamlessly blend into any home, offering both aesthetic appeal and practical functionality. Beyond displaying weather data on their vibrant screens, these devices embrace the spirit of the social media age: acquiring and disseminating information from anywhere. Thanks to their WIFI functionality, accessing your weather data is as simple as a click, whether it's for your personal use or for sharing with others. Free weather platforms facilitate this accessibility, ensuring that your weather information is always within reach, no matter where you are or who you want to share it with.

COLOUR WIFI WEATHER CENTER

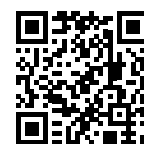

Expand your horizon

Art. No. 7003800

WIFI 4CAST MD Wireless Weather Center

This weather station offers more than just meteorological data; it's your versatile companion for the living room, providing comprehensive weather forecasts and beyond. With its extensive forecast capabilities, it serves as your reliable weather frog, keeping you informed and prepared for whatever nature has in store.

Art. No. 7003800

Solar panel

The multi-sensor has a large solar panel that supplies the sensor with power using the sun.

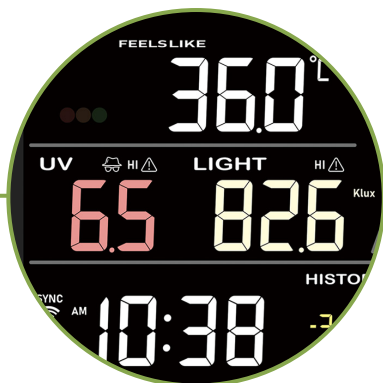

Key Features

- › Weather station with detailed weather forecasts (24 hours/7 days) including graphics on temperature and probability of rain
- › Measures temperature, humidity, precipitation, wind speed/direction, UV level, light intensity, air pressure
- › Compatible with ProweatherLive app/website and other platforms
- › Display with history of air pressure, precipitation, temperature or humidity
- › Operation of the sensor via solar panel, when there is too little sunlight via 3x AA batteries (not included)
- › Expandable with many optional sensors, e.g. water detector, CO₂ sensor, etc.

7-in-1 sensor

The station shows temperature, humidity, precipitation, wind speed/direction, UV level, light intensity and air pressure (with trend graph).

UV level and light intensity

Displaying UV levels and light intensity can help you prevent sunburn.

Scope of delivery

- Base station
- 7-in-1 solar outdoor sensor
- Thermo-Hygrometer sensor
- Power plug

WIFI Comfort Weather Center with 7-in-1 professional sensor and modern colour display

Enjoy excellent visibility from every angle with our weather station's modern LC display. This advanced display provides detailed time and weather information, ensuring you're always well-informed. Plus, it even includes essential data like sunburn time, offering comprehensive insights at a glance.

Art. No. 7003300

Key Features

- › Wireless weather station with WIFI and 7-in-1 professional sensor
- › temperature, humidity, amount of precipitation, wind speed, direction, UV level, light intensity
- › WIFI for publishing on Weather Underground, Weathercloud, AWEKAS
- › History memory, 3 display brightness levels (high, low, off)
- › time, date, day of the week, moon phase, alarm clock with ice warning

Scope of delivery

Base station
Outdoor 7-in-1 sensor
Power plug

WIFI 7-in-1 Weather Center Air-Mon

Experience enhanced living comfort and healthier air with our weather station, complete with a dedicated app and a wealth of weather information. In addition to providing comprehensive weather data, this station also offers insights into the current air quality, empowering you to create a more comfortable and health-conscious living environment.

Art. No. 7003700

Key Features

- › Home weather station with air quality monitor including 7-day forecast
- › Measures temperature, humidity, wind speed/direction, amount of precipitation, light intensity, UV level, air pressure
- › Air quality: PM2.5, PM10, NO2, SO2, O3, CO, AQI (Air Quality Index/Air Quality Index); with comfort level traffic light
- › Current weather and 7-day forecast with high/low temperature
- › Weather and air quality alert function
- › Expandable with additional sensors (not included): thermo-hygro, soil, pool, PM2.5/10, CO₂, HCHO/VOC sensor

Scope of delivery

Base station
Outdoor 7-in-1 sensor
Power plug

Profi-WSC WIFI Weather Center with 7-in-1 Sensor

Stay informed and prepared for any weather condition with our WIFI weather station. With its comprehensive readings, detailed weather forecasts, and customizable alarm functions, you'll always be up to date on the latest weather developments. Plus, it offers additional features to enhance your weather monitoring experience.

Art. No. 7003360

Key Features

- › Measure local data yourself with the WIFI weather station
- › Measures temperature and humidity (indoor/ outdoor), wind direction, UV level, light intensity, wind speed, amount of precipitation and air pressure
- › Read and share weather data on the 14.5 cm (5.7 inch) colour display or online
- › Solar panel on outdoor sensor for longer battery life
- › High/low value alarm and max/min value storage
- › With local weather forecast, perceived outside temperature (feels like), pressure change indicator

Scope of delivery

Base station
Outdoor 7-in-1 sensor
Power plug

WIFI Colour Weather Center with 5in1 profi sensor

Combining style, information, and practicality, our weather station is a standout choice. With its vibrant colour display, accurate weather forecasts, and WIFI connectivity for seamless data publishing over the internet, it offers a complete package for weather enthusiasts. Stay informed, stay stylish, and stay connected with our weather station.

Art. No. 7002580 (black)

Art. No. 7002581 (white)

Key Features

- › Wireless weather station with 7-in-1 multi-sensor and WIFI function
- › wind speed, wind direction, humidity, temperature
- › Rainfall with historical memory, UV level, light intensity
- › Comprehensive display of measurement and history data
- › WIFI connection, wake-up and alarm function including frost/ice warning
- › time and date setting, LED backlight
- › Integrated WIFI transmission to AWEKAS

Scope of delivery

Base station
5-in-1 outdoor sensor
Power plug

Professional WIFI Colour Weather Center 5-in-1 V

Exuding style, delivering information, and offering functionality, this weather station stands out with its colourful display, accurate weather forecasts, and WIFI capability for effortlessly sharing data on various weather platforms. It's the perfect blend of form and function for staying informed about the weather conditions around you.

Art. No. 7002585

Key Features

- › WIFI weather station for measuring, reading and publishing local weather data
- › Measures temperature and humidity (indoor/outdoor), wind speed, direction, humidity, amount of precipitation, air pressure
- › Comprehensive weather information including weather forecast, weather data memory, perceived temperature
- › Practical features such as customizable high/low value alarm, frost warning, room climate indicator
- › Supports up to 7 additional wireless sensors (optional)

Scope of delivery

Base station
5-in-1 outdoor sensor
Power plug

WIFI ClearView Weather Center with 7-in-1 Sensor

The BRESSER WIFI ClearView weather center, equipped with a 7-in-1 sensor, provides an exceptionally comprehensive information service. The multifunctional outdoor sensor can be easily mounted using the included mounting accessories, ensuring easy installation and accurate data collection for your weather monitoring needs.

Art. No. 7002586

Key Features

- › Wireless weather station with 7-in-1 multi-sensor and WIFI function
- › Wind speed, wind direction, humidity, temperature
- › Rainfall with historical memory, UV level, light intensity
- › Comprehensive display of measurement and history data
- › WIFI connection, wake-up and alarm function including frost/ice warning
- › Time and date setting, LED backlight
- › Integrated WIFI transmission to AWEKAS

Scope of delivery

Base station
Outdoor 7-in-1 sensor
Power plug

WIFI 7-in-1 Wireless Weather Center TB

Offering comprehensive measurement data, accurate forecasts, weather warnings, and more, this wireless weather station stands out for its precision and practicality. With its array of features, it provides everything you need to stay informed and prepared for changing weather conditions.

Art. No. 7002582

Key Features

- › User-friendly weather station with 7-in-1 outdoor sensor for comprehensive weather information
- › WIFI connection to access and share local data online
- › Measures temperature, humidity, wind speed/direction, amount of precipitation, UV level, light intensity, air pressure
- › Weather warning function for wind speed, precipitation, air pressure

Scope of delivery

Base station
Outdoor 7-in-1 sensor
Power plug

WIFI 8-in-1 RC Weather Center Heat Stress Index Sahara TB

Achieve flawless planning for every activity with our WIFI weather station featuring an 8-in-1 sensor. This advanced sensor provides comprehensive weather data, including the heat stress index, ensuring you're well-informed about environmental conditions. With additional features like data storage and alerts, you can stay ahead of the curve and make informed decisions based on real-time information.

Art. No. 7003400

Key Features

- › Weather station with 8-in-1 outdoor sensor and 8" LCD screen
- › Wet bulb globe temperature including heat stress index and trend for planning strenuous outdoor activities
- › Temperature, humidity (indoor/outdoor), wind speed, wind direction, precipitation, UV index, light intensity, air pressure
- › Graphical weather forecast for the next 12/24 hours
- › WIFI connection for publishing local data on online weather portals
- › Various data storage and alert functions

Scope of delivery

Base station
8-in-1 outdoor sensor
Power plug

9-in-1 ClearViewTB Weather Center

Stay informed and organized with our versatile weather station, which not only provides weather updates but also keeps track of time. Featuring a heat stress index, weather warnings, and a host of other functions, it ensures you're always prepared for changing conditions. With this weather station, you'll have everything you need to stay ahead and plan your day effectively.

Art. No. 7003150

Key Features

- › Weather station with multi-sensor providing comprehensive weather and time information
- › Measures temperature and humidity (indoor/outdoor), wind speed and direction, precipitation, UV level, and light intensity
- › Wet-bulb globe temperature with a heat stress index
- › Weather forecast and air pressure, weather warnings, and high/low alarm
- › Max./min. value memory and history memory (hourly for 24 hours)
- › Time signal receiver on the outdoor sensor for improved reception

Scope of delivery

Base station
9-in-1 outdoor sensor
Power plug

9-in-1 MeteoChamp HD WIFI Heat Stress Index Weather Center

Experience superior weather monitoring with our weather station boasting an HD-TFT screen, multi-sensor capabilities, and an air quality display. Packed with convenient features, it provides various display modes to present detailed weather information at a glance. Stay informed and prepared with this advanced weather station by your side.

Art. No. 7003520

Key Features

- › Weather station with solar-powered multi-sensor and HD display for various data overviews
- › Temperature, humidity (indoor/outdoor), wind speed, wind direction, precipitation, UV index, light intensity, outdoor air pressure
- › Wet-bulb globe temperature with heat stress index
- › Air quality display via ProWeatherLive: PM2.5, PM10, NO2, SO2, O3, CO, local AQI (Air Quality Index)
- › 24-hour/14-day weather forecast with temperature and precipitation probability
- › WIFI transmission to weather portals; data storage with export function

Scope of delivery

Base station
9-in-1 solar outdoor sensor
Power plug

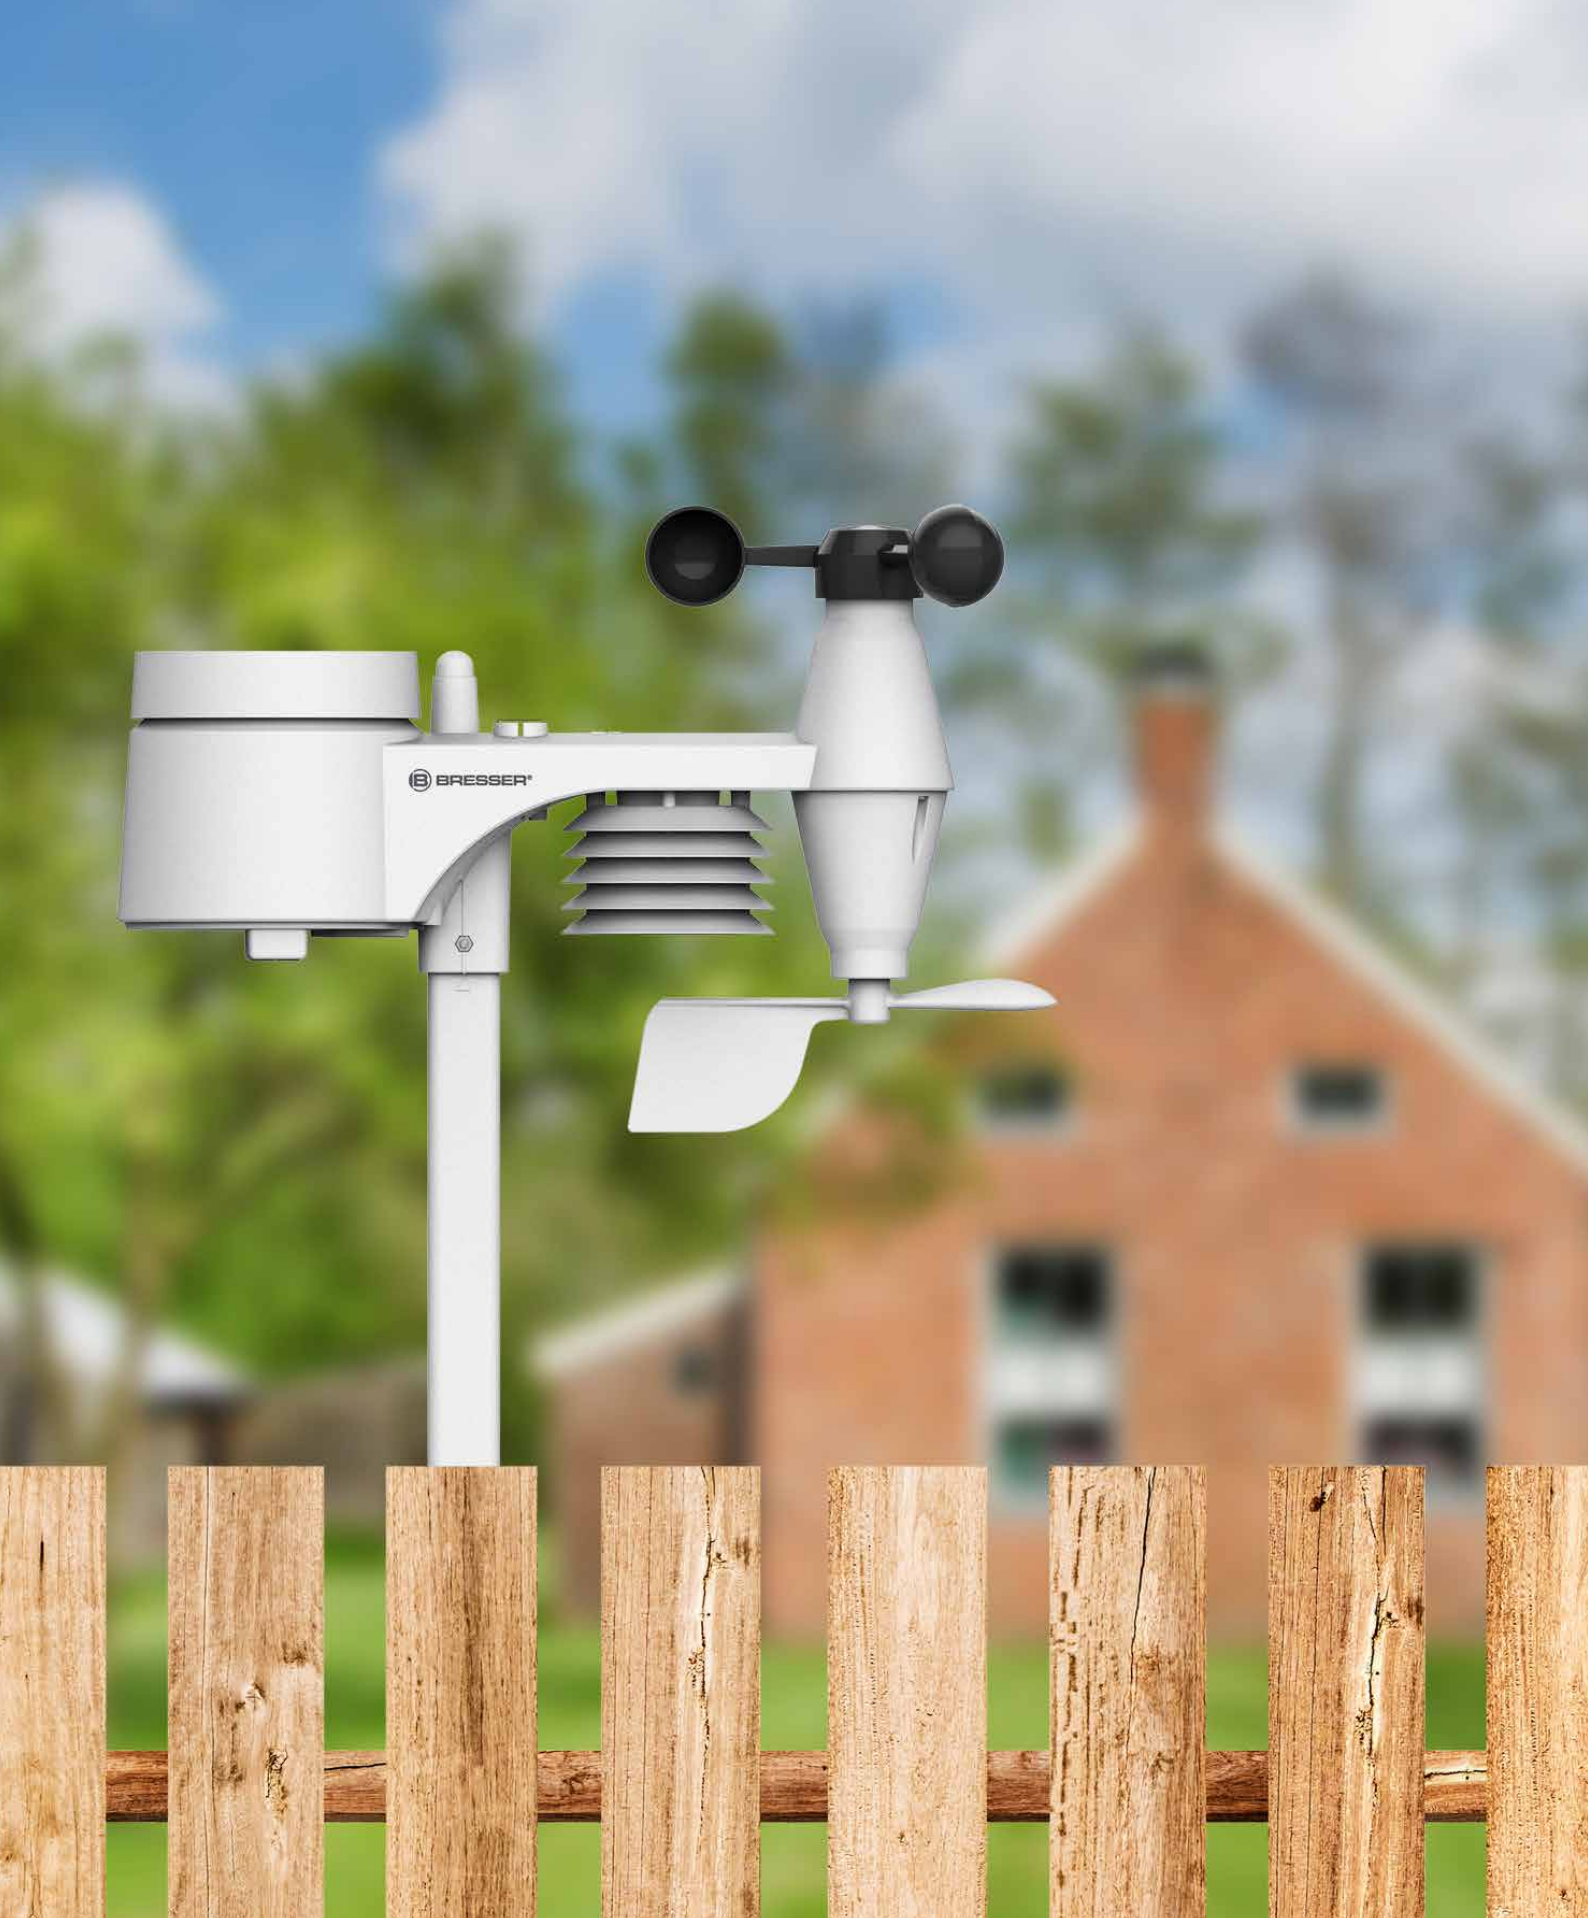

Get a vibrant glimpse of the weather with our stylish colour weather centers, which not only enhance the aesthetics but also provide quick access to the current weather conditions. Equipped with a multisensor, they accurately measure temperature, humidity, wind speed, and more. The well-organised colour display presents precise measurements alongside practical features like weather forecasts. Every BRESSER Colour Weather Center serves as an ideal everyday companion and adds a touch of charm to any space.

COLOUR WEATHER CENTER

Expand your horizon

Art. No. 7002525

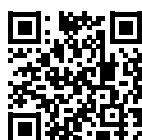

Weather Center 5-in-1 Beaufort with colour display

Experience the ultimate in meteorological versatility with our elegant wireless weather station, complete with wind and rain gauges. This comprehensive system delivers reliable information about your local weather conditions, ensuring you're always well-informed and prepared for whatever Mother Nature has in store.

Art. No. 7002525

5-in-1 outdoor sensor

Display of temperature and humidity (indoor/outdoor), air pressure, wind speed, wind direction, amount of precipitation

Key Features

- › Wireless weather station with 5-in-1 outdoor sensor and colour display
- › Temperature and humidity (indoor/outdoor), air pressure
- › Wind speed, wind direction, amount of precipitation
- › Weather forecast; min./max. value storage
- › High/low alarm; room climate indicator
- › Alarm clock with snooze function and ice warning
- › Radio-controlled time and date setting, moon phase
- › Automatic backlight dimming

Clear colour display

In addition, the weather station offers a large display with clever layout – for a quick weather check at a glance.

Time and date via radio signal

Radio-controlled time and date setting, including day of the week, moon phase, alarm with snooze function (snooze), ice/frost alarm.

(white)

Art. No. 7002512
(wood look)

5-in-1 outdoor sensor

Measurement of wind speed, wind direction, humidity, temperature and amount of precipitation.

Key Features

- › Wireless weather station with 5-in-1 multi-sensor
- › Measurement of temperature, wind speed and air pressure
- › Humidity & precipitation meter with history memory
- › Compact 5-in-1 multifunction outdoor sensor
- › Comprehensive display of measurement and history data
- › Wake/alarm function including frost/ice warning
- › Radio-controlled time and date setting (DCF)
- › LED backlight

Wind measurement

The 5-in-1 outdoor sensor reliably transmits measurement values for wind speed and wind direction.

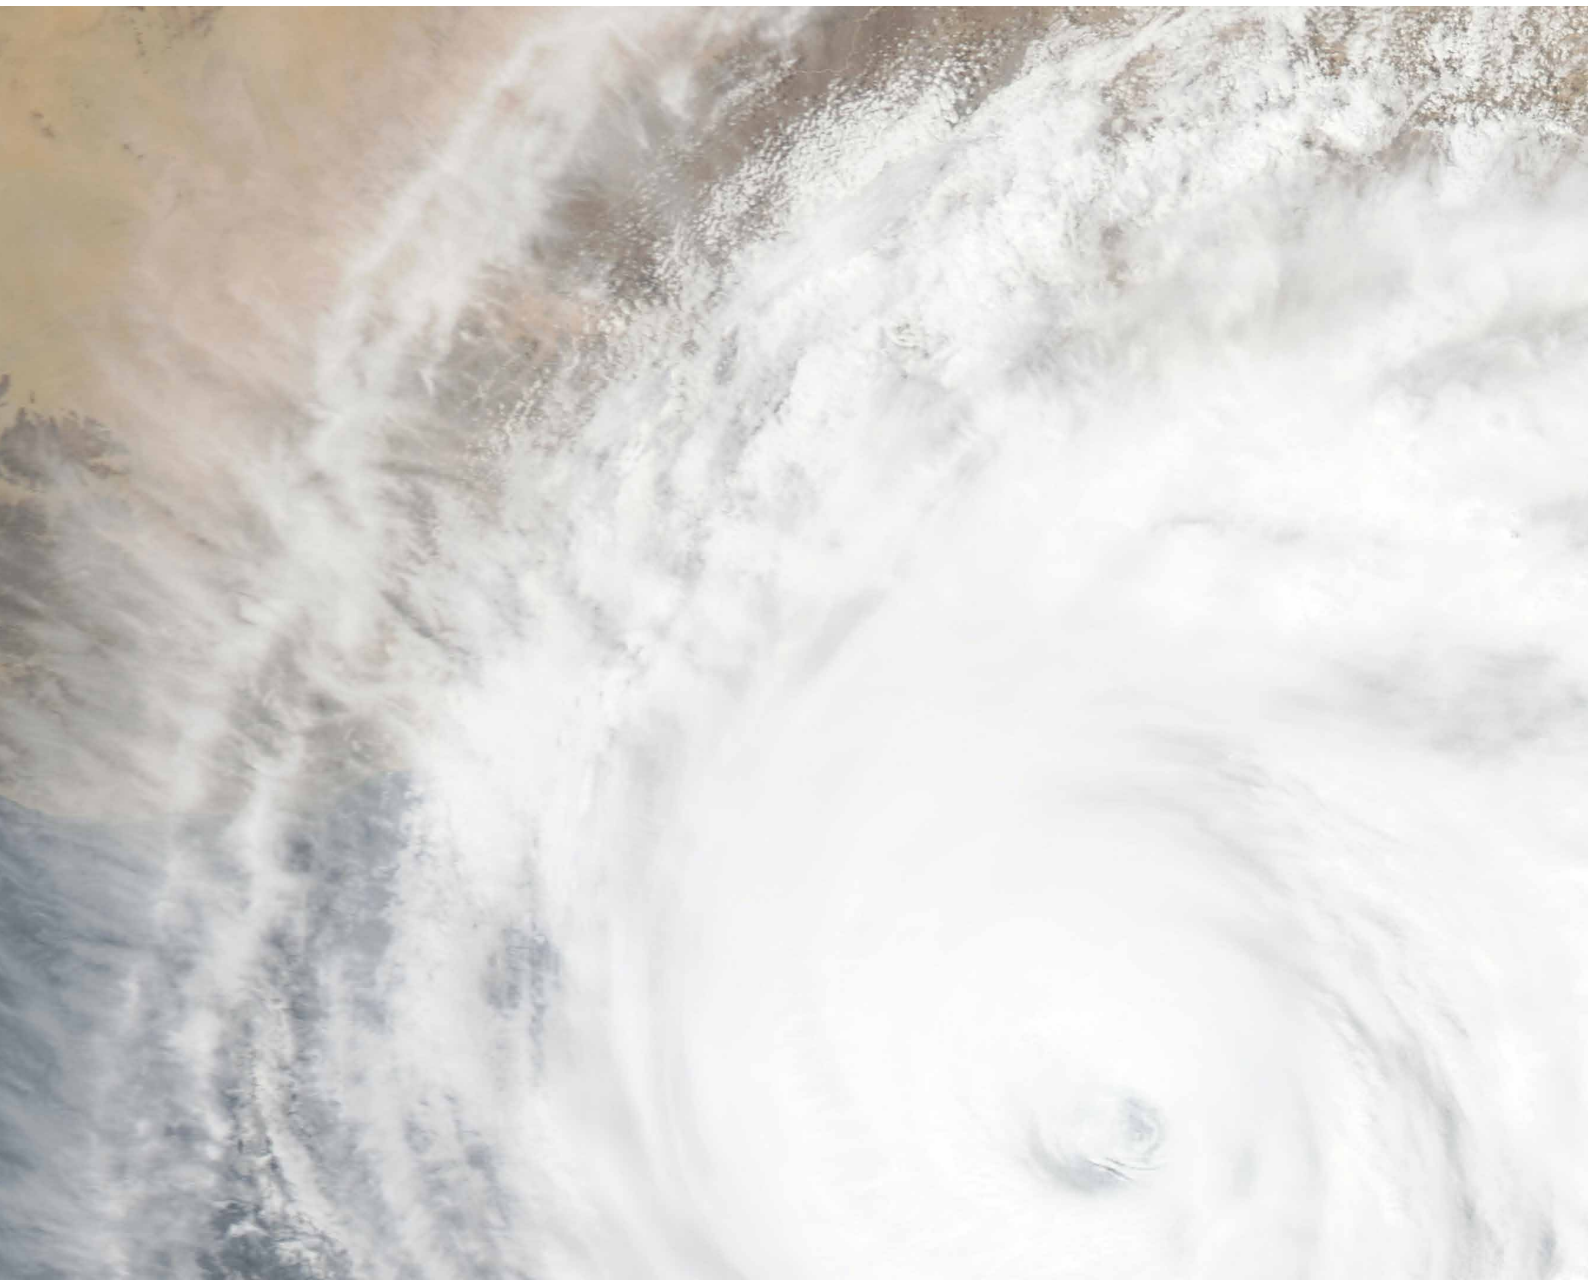

Beaufort Index

The Beaufort scale is a scale for classifying wind strength based on observing visual cues such as wave height and speed. It ranges from 0 (calm) to 12 (hurricane) and is often used to easily and quickly estimate wind strength.

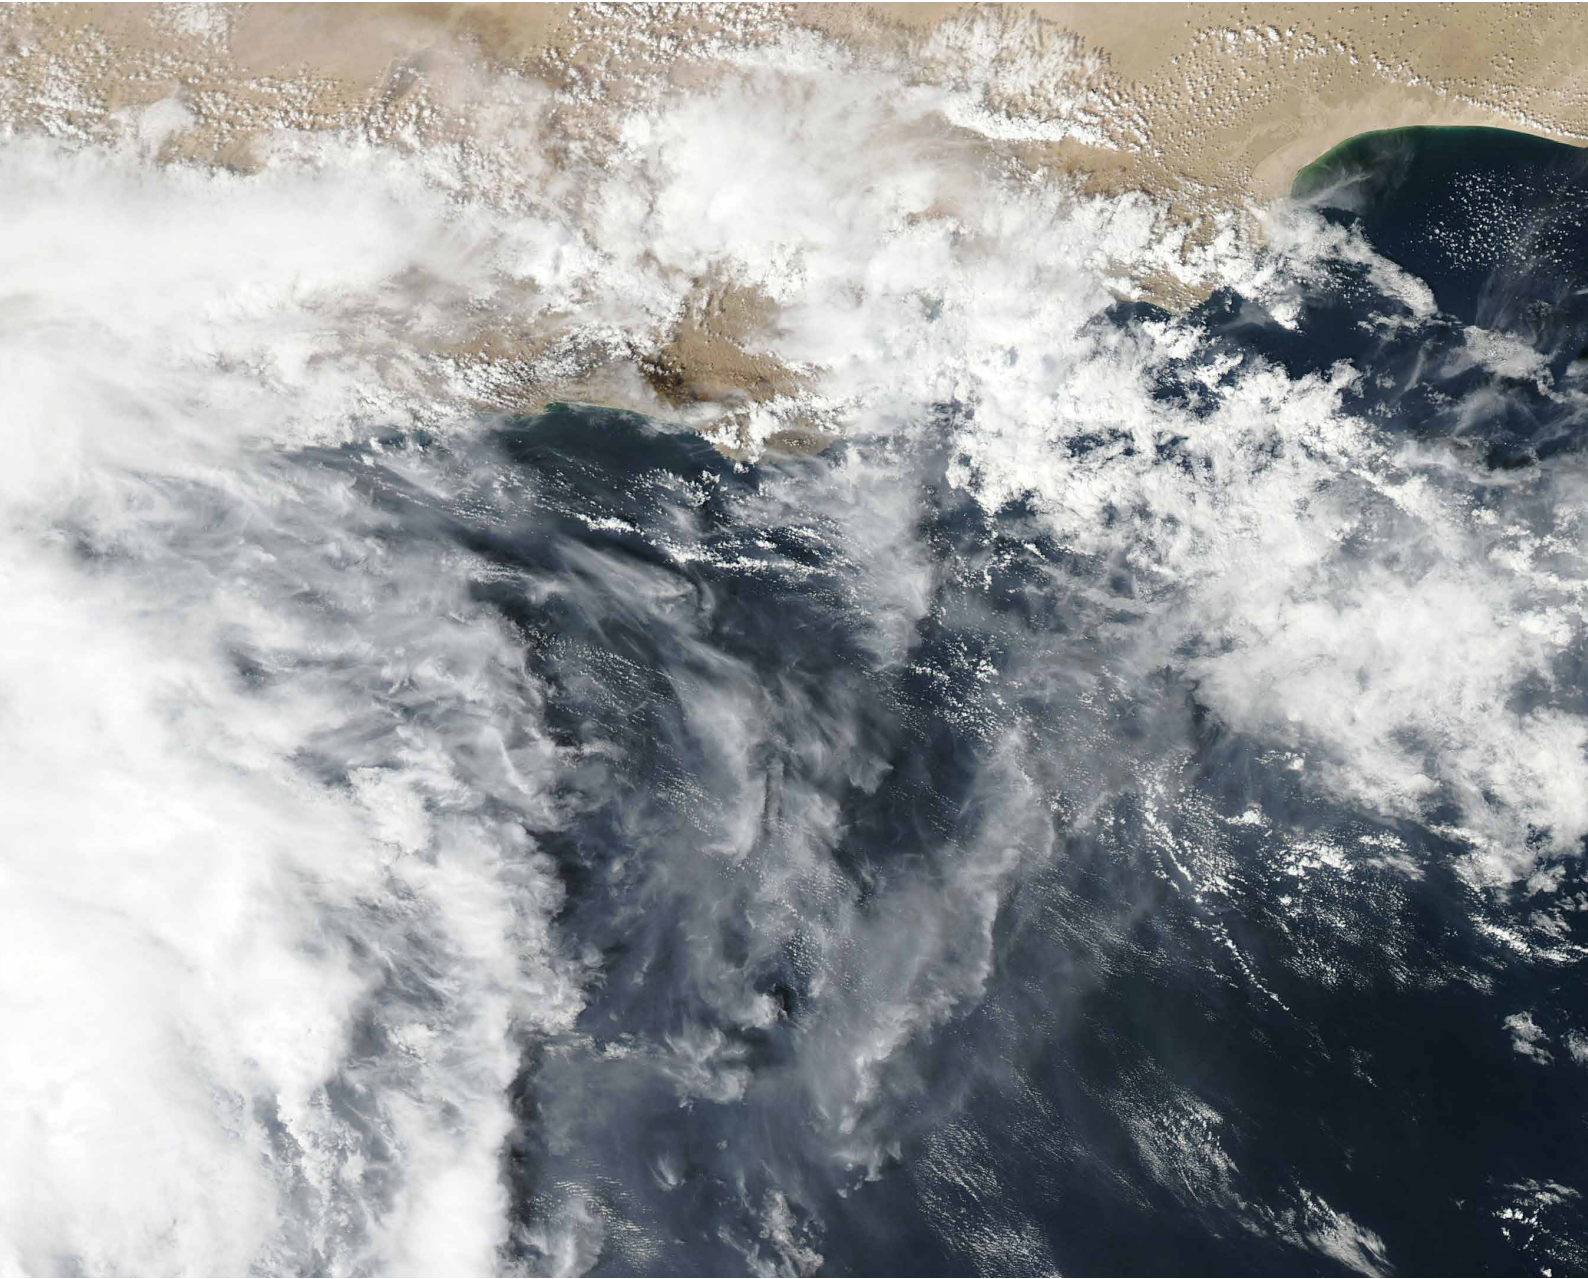

Scope of delivery

Base station	6 pcs. Requires AA batteries
5-in-1 outdoor sensor	(Not included)

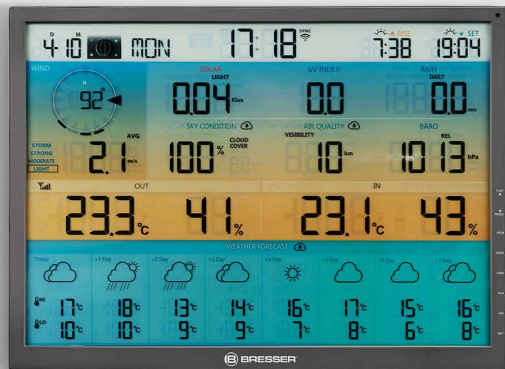

Say goodbye to meteorological surprises with our 4Cast weather stations – you'll always be one step ahead of the weather. Thanks to the WIFI function, the base station receives reliable local weather forecasts for up to 11 days from the trusted ProWeatherLive weather service. Additionally, your own measured values are displayed on the appealing screen and in the app. And for the environmentally conscious, our multisensors are partially or completely solar-powered, ensuring sustainability without compromising performance.

4CAST WEATHER CENTER

Expand your horizon

Art. No. 7003230

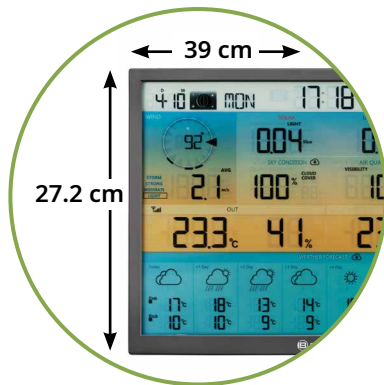

8-Day 4CAST XL 7-in-1 WIFI Weather Center solar

This weather station truly stands out with its large 48.3 cm display, providing clear visibility from a distance. Featuring a comprehensive 8-day weather forecast and an environmentally friendly solar multi-sensor, it offers both convenience and sustainability. With its impressive size and advanced features, it's the perfect choice for staying informed about the weather in style.

Art. No. 7003230

19" Colour display

Extra-large 48,3 cm (19") colour display with narrow bezel

Key Features

- › Large solar weather station with 8-day forecast and many functions
- › Measures temperature, humidity, amount of precipitation, wind speed/direction, UV level, light intensity, air pressure
- › Comprehensive local weather data to read and share on Internet portals
- › Operation of the sensor completely via movable solar panel
- › Internet time synchronization, sunburn time
- › Perceived outside temperature, dew point, wind coolness and heat index
- › Supports up to 7 additional sensors (not included)

Clouds and light intensity

The station shows you the local cloudiness and measures the UV level (0-16) and light intensity (Klux).

8-day weather forecast

Thanks to the large display, the station shows you all weather forecasts for today and the next 7 days at the same time.

Scope of delivery

Base station
7-in-1 solar outdoor sensor

6-Day 4CAST PRO SF 7-in-1 WIFI Weather Center solar

Experience the ultimate in weather monitoring with our weather station, equipped with a solar multi-sensor and a stylish colour display. This innovative system offers a comprehensive 6-day weather forecast, providing you with clear visibility of the weather conditions for the week ahead. Stay informed and prepared with our advanced weather station.

Art. No. 7003210

Key Features

- › Solar weather station with 6-day weather forecast & WIFI
- › Measures temperature, humidity, amount of precipitation, wind speed/direction, light intensity, UV level, air pressure
- › Read/share local data/forecasts; with sunburn time
- › Internet time synchronization, alarm clock with snooze function
- › Ice/frost warning, air pressure display, sensed outside temperature
- › Supports up to 7 additional sensors (optional)
- › Weather index for dew point, wind chill factor and heat index

Scope of delivery

Base station
7-in-1 solar outdoor sensor
Power plug

4-Day 4CAST 7-in-1 WIFI Weather Center solar

4x weather vision — with the WIFI weather station including 4-day forecast and practical features such as sunburn time.

Art. No. 7003200

Key Features

- › WIFI weather station with weather forecast for 4 days including probability of rain and high/low temperature
- › Measures temperature and humidity (indoor/outdoor), wind speed/direction, amount of precipitation, UV level, light intensity, air pressure
- › Read local data and share it via weather portals such as AWEKAS; alarm clock with frost warning; max/min memory
- › weather index (dew point, wind chill factor, heat index); perceived outside temperature; Beaufort value; internet time
- › Expandable with up to 7 additional sensors (not included)

Scope of delivery

Base station
7-in-1 solar outdoor sensor
Power plug

Don't let the cold outside or dryness inside catch you off guard. With our colour weather stations, essential information like temperature, humidity, and weather forecast is always at your fingertips. Quickly ensure a healthy indoor climate with precise measurement data and corresponding indicators displayed prominently. Whether you need to grab an umbrella or a sun hat, the intuitive colour-coded display makes finding the information you need a breeze. Stay informed and prepared with our convenient and user-friendly weather stations.

COLOUR WEATHER STATIONS

Expand your horizon

Art. No. 7007620

RC Colour Weather station with Frameless Display

Eye-catchingly different – this elegant weather station boasts a modern, frameless colour display, reliable weather data and practical features.

Art. No. 7007620

frameless

The colour display is completely frameless, which gives the weather station a modern, elegant look.

Key Features

- › Frameless colour display
- › Graphical weather forecast
- › Temperature with trend and humidity (indoor/outdoor)
- › Air pressure
- › Indoor climate comfort indicator (for built-in and wireless sensor)
- › Automatic DCF time/date setting, moon phase

Room climate comfort indicator

Whether it's humid, dry or just right, the comfort indicator shows whether everything in the room is okay in terms of air conditioning.

Thermo-/Hygrometer

As a thermometer and hygrometer, the weather station's wireless sensor reliably provides the relevant data in one.

Scope of delivery

The BRESSER weather station ClimaTemp TB has a clearly designed colour display, which is divided into four areas.

Art. No. 7007201

Key Features

- › DCF radio clock, weather forecast & alarm clock with snooze function
- › Base power supply, optional 3x AAA, sensor: 2x AAA batteries
- › A maximum of 3 sensors can be connected (1 included); range of 30 m
- › Required batteries: 5x AAA

Scope of delivery

Weather station
outdoor sensor
Power plug

Weather station MeteoTemp BF with touch display

Weather forecast, mould warning, indoor climate indicator and more — with this touchscreen weather station, you are guaranteed to get warm quickly.

Art. No. 7007511

Key Features

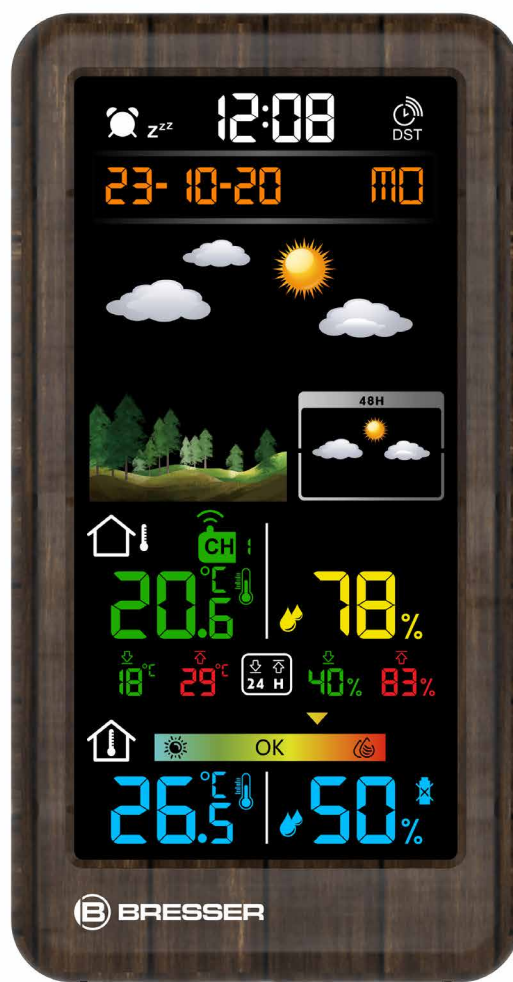

- › Weather station with outdoor sensor and touch display
- › Weather forecast, temperature and humidity
- › Room climate comfort indicator and mold risk indicator
- › Alarm function for temperature and humidity
- › Heat index and dew point
- › Max./min value storage
- › Automatic time and date setting (DCF), alarm
- › Base 3x AAA, sensor: 2x AAA batteries

Scope of delivery

Weather station
outdoor sensor

RC Weather station Neomeo V

Stay informed effortlessly: This weather station impresses with 24 and 48-hour forecasts and features like comfort indicator, and an outdoor temperature alarm.

Art. No. 7006510

Key Features

- › Graphical weather forecast for the next 24 and 48 hours
- › Temperature and humidity (indoor/outdoor)
- › Indoor climate comfort indicator
- › Temperature alarm for the outdoor sensor
- › 24 hours max/min temperature and humidity
- › Automatic DCF time/date setting, built-in alarm clock

Scope of delivery

Weather station
Thermo/hygrometer wireless sensor
Power plug

RC Weather station Neomeo H

Colourful weather outlook: With the weather station for precise measurements, including practical features like a comfort indicator and outdoor temperature alarm.

Art. No. 7007350

Key Features

- › Graphical weather forecast
- › Temperature and humidity (indoor/outdoor)
- › Indoor climate comfort indicator
- › Temperature alarm for the outdoor sensor
- › Shows 24-hour max/min temperature and humidity
- › Automatic DCF time/date setting, built-in alarm clock

Scope of delivery

Weather station
Thermo/hygrometer wireless sensor
Power plug

MeteoTemp Baro HZ Colour Weather station

Keep track of both outdoor and indoor climates effortlessly with this weather station featuring a colour display. Alongside providing a weather forecast, it also displays air pressure history and a plethora of other information and features. Stay informed and prepared for any weather condition with this comprehensive weather station always at your fingertips.

Art. No. 7007520

Key Features

- › Weather station with outdoor sensor and colour display
- › Weather forecast, temperature and humidity (indoor/outdoor) with trend
- › Air pressure with history display
- › Automatic time and date setting (DCF)
- › Integrated alarm clock, 2 alarm times adjustable

Scope of delivery

Weather station
Thermo/hygrometer wireless sensor
Power plug

MeteoCast Pico Colour Weather station

Small but mighty: The compact weather station with an outdoor sensor gives you a comprehensive overview with temperature, humidity, weather forecast, and time.

Art. No. 7000030

Key Features

- › High-quality weather station with outdoor sensor and colour display
- › Weather forecast, temperature and humidity (indoor/outdoor)
- › Max./min value storage
- › Automatic time with seconds display via DCF signal
- › Alarm function with snooze button

Scope of delivery

Weather station
Thermo/hygrometer wireless sensor
Power plug

RC Weather station MeteoTemp TBH

Elegant and reliable: the modern weather station with forecast, temperature and humidity, as well as air pressure history and temperature alarm.

Art. No. 7004370

Key Features

- › Graphical weather forecast
- › Temperature and humidity (indoor/outdoor)
- › Air pressure with history diagram
- › Max./min. value memory for temperature and humidity
- › High/low alarm for temperature
- › Automatic DCF time/date setting, moon phase, alarm function

Scope of delivery

Weather station
Thermo/hygrometer wireless sensor
Power plug

RC Weather station MeteoTemp TBV

Elevate your weather monitoring experience with our stylish weather station, boasting a sleek design and a host of features. From graphical forecasts to detailed indoor and outdoor climate data, including air pressure overviews, this weather station provides a comprehensive view of the weather. Stay informed and add a touch of elegance to your space with this chic addition to your home.

Art. No. 7004380

Key Features

- › Graphical weather forecast
- › Temperature and humidity (indoor/outdoor)
- › Air pressure with history diagram
- › Max./min. value memory for temperature and humidity
- › High/low alarm for temperature
- › Automatic DCF time/date setting, moon phase, alarm function

Scope of delivery

Weather station
Thermo/hygrometer wireless sensor
Power plug

Whether your style is puristic, industrial, or Mediterranean, our wireless weather stations blend seamlessly into any living environment with their discreet and stylish design. While they enhance the aesthetic appeal of your space, their primary focus remains on providing reliable information on temperature, humidity, and weather forecasts. These weather stations are designed to support you in everyday life, whether it's helping you choose the right wardrobe or ensuring a healthy indoor climate. Additionally, hobby weather enthusiasts will appreciate that some models also display the development of air pressure, adding an extra layer of insight to their weather monitoring experience.

WEATHER STATIONS

Expand your horizon

Art. No. 7004330

Weather station MeteoTemp TBH

Precise weather monitoring for your home — with the weather station with temperature, humidity, air pressure history, weather forecast and much more.

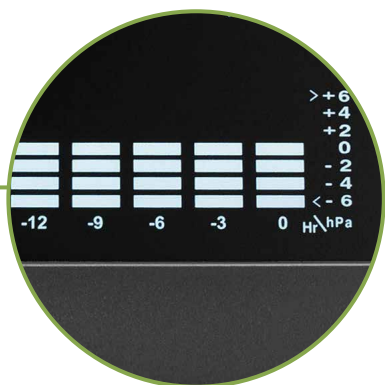

Art. No. 7004330

Date and time

In addition to all weather information, the station also offers an automatic time and date setting (DCF) and an alarm clock with snooze function.

Air pressure history

Are you interested in weather development? Then simply look at the air pressure history.

Moon phase

The current phase of the moon is shown on the display.

Key Features

- › Modern weather station with thermo-hygro outdoor sensor
- › Temperature and humidity indoor and outdoor
- › Graphical weather forecast and air pressure curve
- › Max./min value storage for temperature and humidity
- › Automatic time and date setting (DCF)
- › Integrated alarm clock with snooze function (snooze)
- › Moon phase
- › Backlight
- › Low battery indicator

Scope of delivery

Base station
Wireless sensor
CR2032 back-up battery
Power plug

Weather station MeteoTemp TBV

Perfect partner for weather enthusiasts: the weather station with forecast, temperature and humidity as well as air pressure history and temperature alarm

Art. No. 7004340

Date and time

In addition to all weather information, the station also offers an automatic time and date setting (DCF) and an alarm clock with snooze function.

Key Features

- › Modern weather station with thermo-hygro outdoor sensor
- › Temperature and humidity indoor and outdoor
- › Graphical weather forecast and air pressure curve
- › Max./min value storage for temperature and humidity
- › Automatic time and date setting (DCF)
- › Integrated alarm clock with snooze function (snooze)
- › Moon phase
- › Backlight
- › Low battery indicator

Air pressure with history graph

Would you like to better understand weather developments? MeteoTemp TBV then offers an air pressure history graph.

Outdoor thermo-hygro sensor

Whether in the garden or on the balcony — simply choose the perfect place for the wireless sensor. The long range of up to 80 m gives you plenty of freedom.

Scope of delivery

Base station
Wireless sensor
CR2032 back-up battery
Power plug

Weather Station Translucidus NV

For your clarity in weather, indoor climate, and time: the Translucidus NV wireless weather station with a stylishly transparent display is an absolute eye-catcher!

Art. No. 7007610

Key Features

- › Chic weather station with outdoor sensor and transparent display
- › Temperature and humidity (indoor/outdoor), air pressure
- › Weather forecast and indoor climate comfort indicator
- › Ice warning and high/low value alarm for outdoor temperature
- › Time, date, weekday, and alarm function

Scope of delivery

Weather station
Thermo/hygrometer wireless sensor

Art. No. 7004350

RC Weather Station ClimateTemp NDH-NEO

Meteorological eye-catcher: The weather station presents its precise measurement data on an elegantly simple display.

Art. No. 7004350

Key Features

- › Graphical Weather Forecast
- › Temperature and humidity (indoor/outdoor)
- › Air pressure with history diagram
- › Automatic DCF time/date setting, moon phase, built-in alarm clock

Scope of delivery

Weather station
Thermo/hygrometer wireless sensor

RC Weather Station ClimateTemp NDV-NEO

A real visual highlight, the weather station scores points not only for its reliable readings, but also for its stylish design.

Art. No. 7004360

Key Features

- › Graphical Weather Forecast
- › Temperature and humidity (indoor/outdoor)
- › Air pressure with history diagram
- › Automatic DCF time/date setting, moon phase, built-in alarm clock

Scope of delivery

Weather station
Thermo/hygrometer wireless sensor

Meteo Temp weather station

Temperature, weather trend, time and date on a clear display — you are guaranteed to warm to this radio controlled weather station.

Art. No. 7004200MGU000
(anthracite)

Art. No. 7004200
(black)

Art. No. 7004200GYE000
(white)

Art. No. 7004200HZI000
(silver)

Art. No. 7004200QT5000
(gray)

Key Features

- › Wireless weather station with temperature and weather trend display and frost warning
- › Reliable temperature measurement indoor and outdoor; with extra large display, easy to read even for seniors and people with poor eyesight
- › Frost warning as display icon; automatic time and date setting (DCF); outdoor sensor range: 50 m
- › Required batteries: 2x AAA (base) and 2x AAA (sensor) - not included

Scope of delivery

Weather station
outdoor sensor

3-in-1 professional wind gauge

The BRESSER wind gauge is a professional-grade anemometer perfect for home gardens. With the accompanying base station, you can easily monitor various wind parameters including current wind speed, average values, and maximum values per hour, day, month, or year. This comprehensive system provides valuable insights to help you better understand and manage wind conditions in your garden environment.

Art. No. 7002531

Key Features

- › Measurement of wind speed, temperature, humidity
- › Display of average speed or current gusts
- › Maximum values per hour, day, month, year
- › Graphical weather forecast for the following 24 hours
- › Base station measures indoor temperature and humidity
- › Automatic time setting via DCF radio signal
- › Frost warning and wind speed alarm

Scope of delivery

Base station
Wind gauge

Professional Rain Gauge

Rain gauge plus — with temperature, humidity, clock and alarm clock.

Art. No. 7002530

Key Features

- › Rain gauge (109x109x200mm; 375g) with histogram
- › 868 Mhz radio signal up to 150 m range
- › Alarm function, measurement of temperature and humidity
- › SINCE function to display the total precipitation from a certain point in time
- › Lowest and highest value display
- › Max-/Min-values storage
- › Backlight
- › Battery-powered (station: 2x AA; sensor: 4x AA) (batteries not included)

Scope of delivery

Base station
Rain gauge

Professional Rain Gauge WTW

Rain monitor with additional features — besides precipitation, this measuring device also keeps you updated on temperature, humidity, time, and date.

Art. No. 7002533

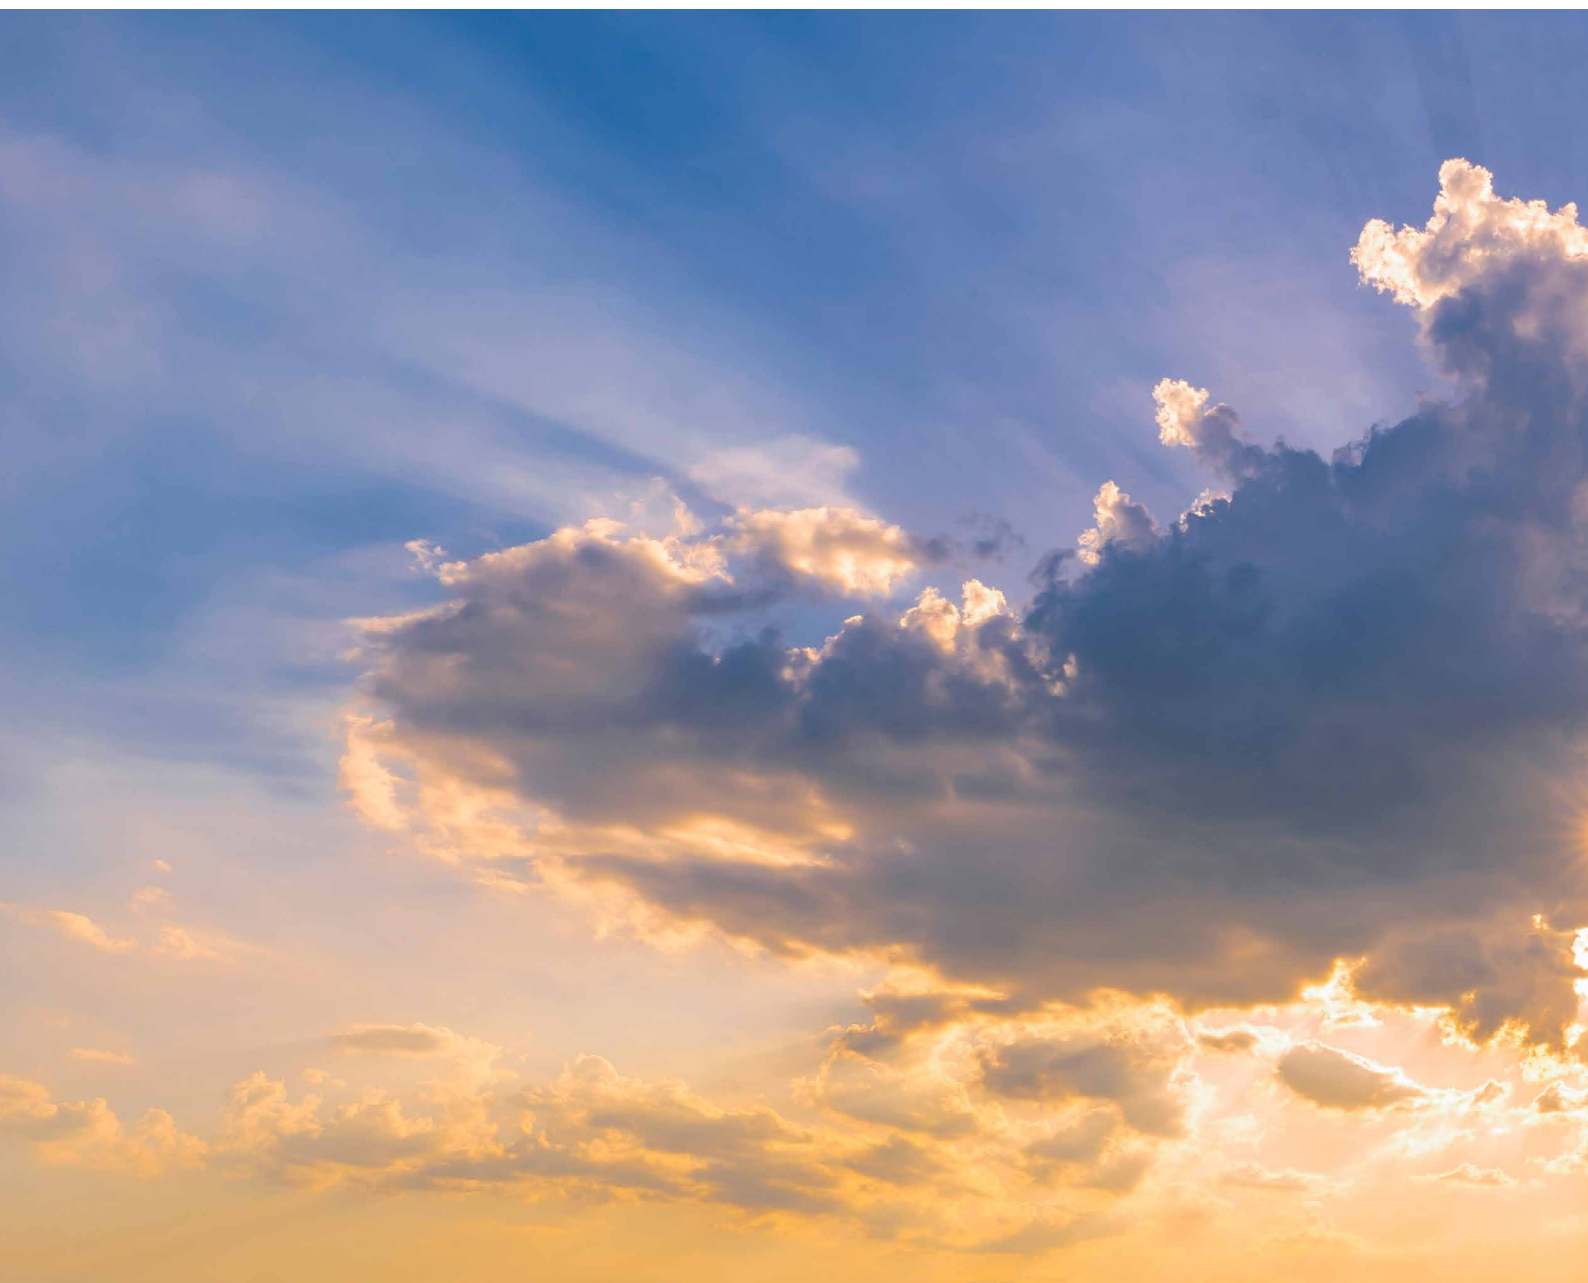

Key Features

- › Precise rain gauge with histogram
- › Measures precipitation, temperature, and humidity (indoor/outdoor)
- › Max./min. value memory with timestamp
- › Display of rainfall rate for different time periods
- › Various alert functions
- › Feature for displaying total precipitation from a selected point in time

Scope of delivery

Base station
Rain gauge

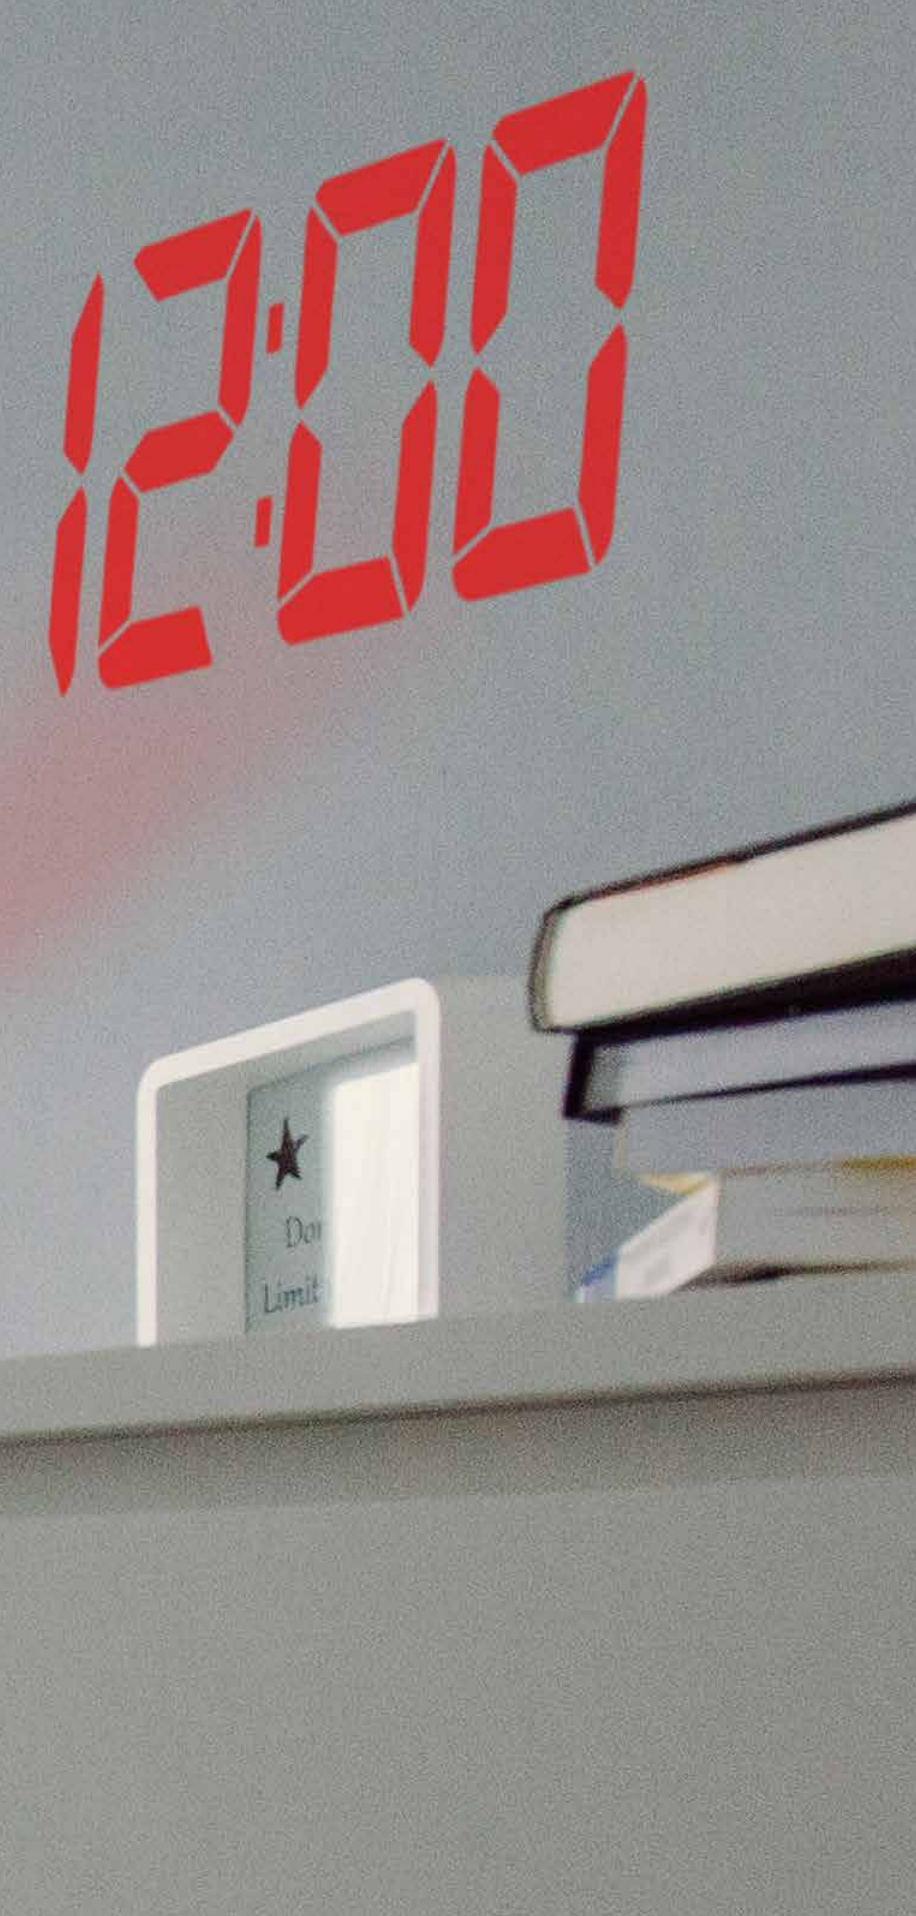

Elevate the ambiance of your living room, bedroom, or office with our projection radio-controlled weather station, a meteorological centerpiece in any space. This innovative station projects the time and graphical weather forecast directly onto the ceiling or wall, providing a modern perspective on these essential daily details. Additionally, you can view these details on the device's display, alongside other useful features such as temperature and humidity data. Enjoy the convenience and sophistication of our projection weather station, bringing both style and functionality to your surroundings.

PROJECTION WEATHER STATION

Expand your horizon

Art. No. 7004405

Projection RC Weather Station MeteoTemp P

This innovative radio-controlled clock gets itself noticed, by projecting the time and weather forecast onto nearby ceilings or walls. The main unit has even more detail on the LCD display.

Art. No. 7004405

Projection of weather forecast and time

The radio-controlled weather clock projects the time and the graphical weather forecast directly onto the ceiling or wall.

Key Features

- › Weather station with projection of time and weather forecast symbol on ceiling/wall
- › Indoor/outdoor temperature (°C/°F), indoor/outdoor humidity
- › Frost warning, max/min temperature display
- › Time, date, day of the week and alarm function
- › Up to 3 thermo-hygro wireless sensors can be connected (1x included)
- › Backlight
- › Power supply: AC adapter (included), 2x AAA batteries (not included)

Wireless weather station

The wireless weather station displays all important weather data and offers practical additional functions such as the integrated alarm clock and max/min value storage for the temperature.

Outdoor thermo-hygro sensor

The thermo-hygro outdoor sensor has its own display on which the measurement data can be easily read on site.

Scope of delivery

Weather station
Thermo/hygrometer wireless sensor
Power plug

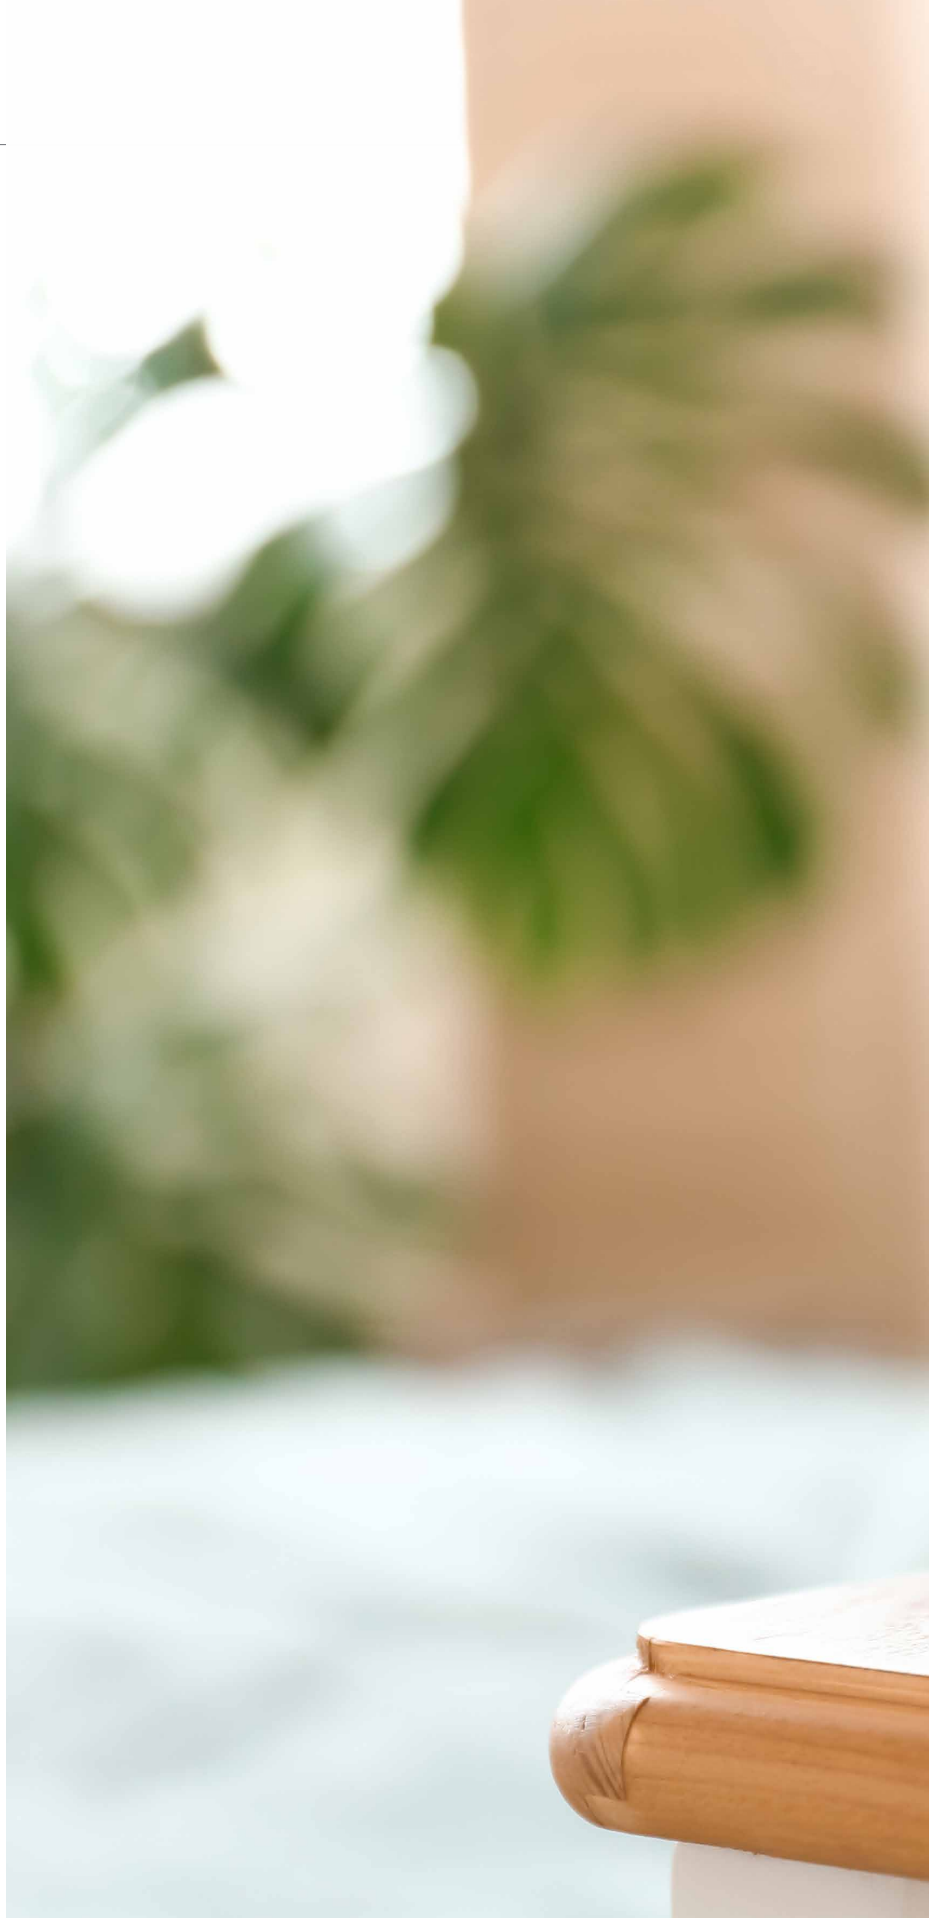

Ensure comfort and safety in every room of your home with our multisensor thermo-hygrometers. A quick glance at the display reveals essential information, indicating whether it's comfortably warm in the children's room or too damp in the basement, helping you prevent mould and protect your belongings. What's more, the wireless sensors feature their own screens, allowing you to make informed decisions about adjusting heating or opening windows right where you are. With our convenient and versatile thermo-hygrometers, you can maintain optimal conditions throughout your home with ease.

MULTISENSOR THERMO- / HYGROMETER

Expand your horizon

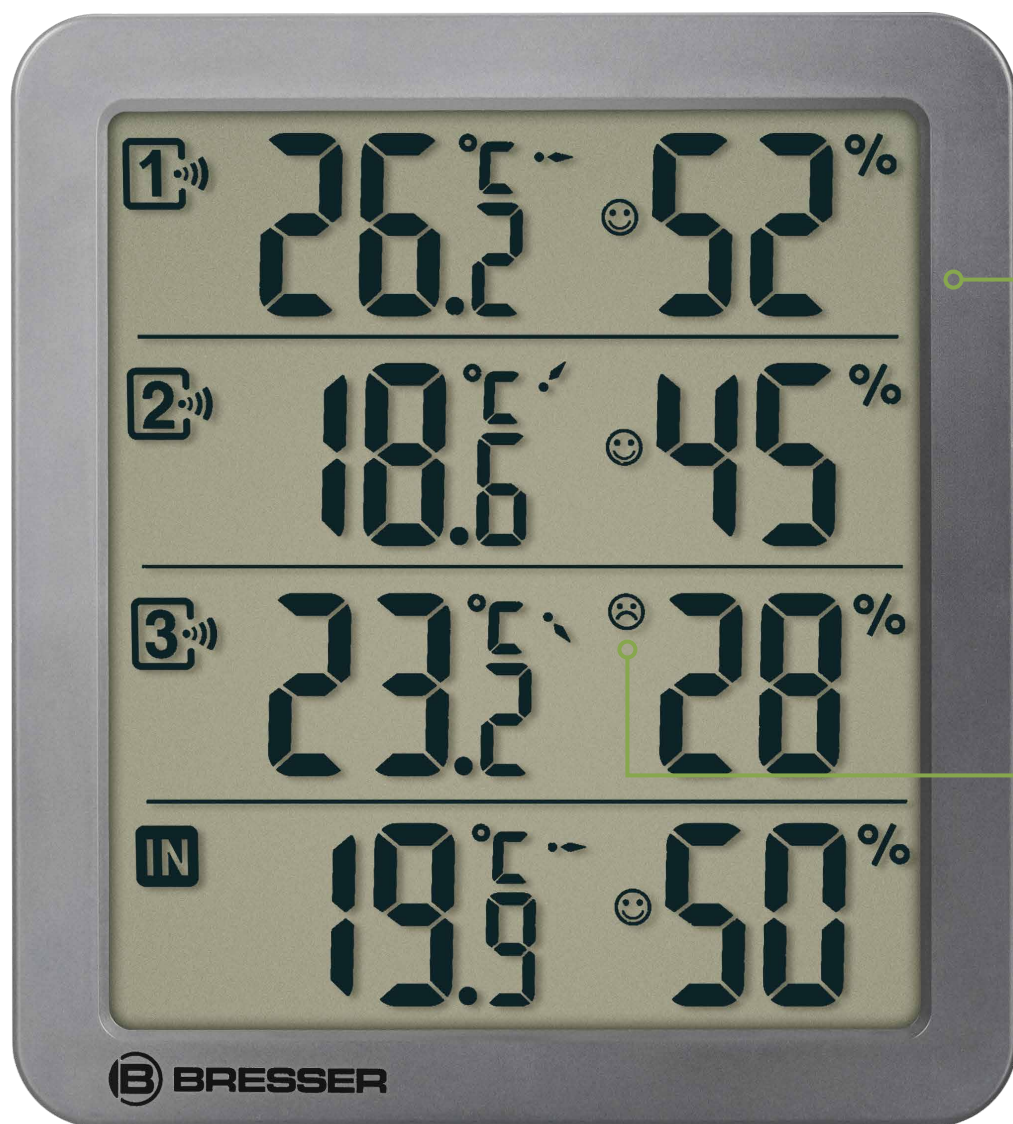

Art. No. 7000060

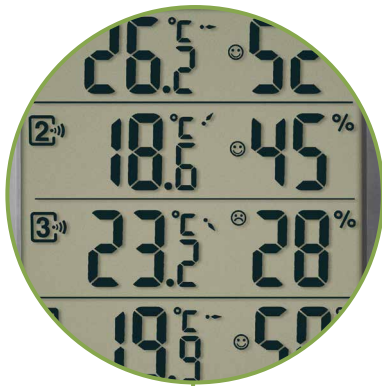

Quadro NV Thermo-Hygrometer

4x temperature and humidity on 1 screen — with the thermo-hygrometer, including one built-in and three wireless sensors.

Art. No. 7000060

4 measurement results

The 12.7 cm (5") display offers the simultaneous display of 4 measurement results for temperature and relative humidity.

Key Features

- › Thermo-hygrometer with built-in sensor and 3 outdoor sensors
- › 4 measurement results for temperature and relative humidity
- › Indoor climate comfort indicator as smiley symbol
- › Max./min. value memory
- › High/low alarm

Comfort indicator (climate)

The indoor climate indicator gives you a reliable indication of the state of air quality. Whether you're smiling, hanging down or straight corners of your mouth — depending on the expression of the smiley, you know intuitively whether it's time for a change of breath.

3 outdoor sensors

The 3 included wireless thermo/hygrometer sensors can be placed anywhere outdoors or indoors and provide measurement values for temperature and relative humidity.

Scope of delivery

Base station
3x thermo/hygrometer wireless sensor

Quadro NV Thermo-Hygrometer

4x indoor climate at a glance — with the thermo-hygrometer, including 1 built-in and 3 wireless sensors.

Art. No. 7000029

Key Features

- › Thermo-hygrometer with built-in sensor and 3 outdoor sensors
- › 4 measurement results for temperature and relative humidity
- › Indoor climate comfort indicator as smiley symbol
- › Max./min. value memory
- › High/low alarm

Scope of delivery

Base station
3x thermo/hygrometer wireless sensor

Thermo Hygro Quadro NLX - Thermo-/Hygrometer with 3 outdoor sensors

Multifunctional thermo/hygrometer with colour display.

Art. No. 7000023

Key Features

- › Clear multi-colour display
- › Time information via DCF radio transmission
- › Date and day of the week display
- › alarm function
- › 4 Measurement results for temperature and relative humidity
- › Early prevention of mould
- › 433 MHz transmission frequency
- › Remote sensors are splash-proof, making them suitable for outdoor use
- › Thermo/hygro remote sensor (3x incl.)

Scope of delivery

Base station
3x thermo/hygrometer wireless sensor
Power plug

ClimaTrend Hygro Quadro - thermo- and hygrometer with 4 independent measuring details

The thermo-hygrometer is perfect for preventing mould formation and too dry indoor air in up to 4 rooms.

Art. No. 7000020CM3000
(black)

Art. No. 7000020GYE000
(white)

Art. No. 7000020QT5000
(grey)

Key Features

- › 4 Measurement results for temperature and relative humidity
- › With room climate comfort indicator as a smiley symbol
- › Thermo/hygro remote sensors (3x included), measurement accuracy: temperature 1 °C, humidity 5%
- › Also suitable for moisture room monitoring
- › Mounting type: Base and wall mount
- › Requires 3x AAA/LR03 batteries (for the base station) and 6x AAA/LR03 batteries (for the wireless sensors)

Scope of delivery

Base station
3x thermo/hygrometer wireless sensor

Quadro Individio Weather station

More room for the climate - indoors and out: with the weather forecast and the thermometers/hygrometers, you always have an overview of weather conditions as well as 4x temperature and humidity.

Art. No. 7000027

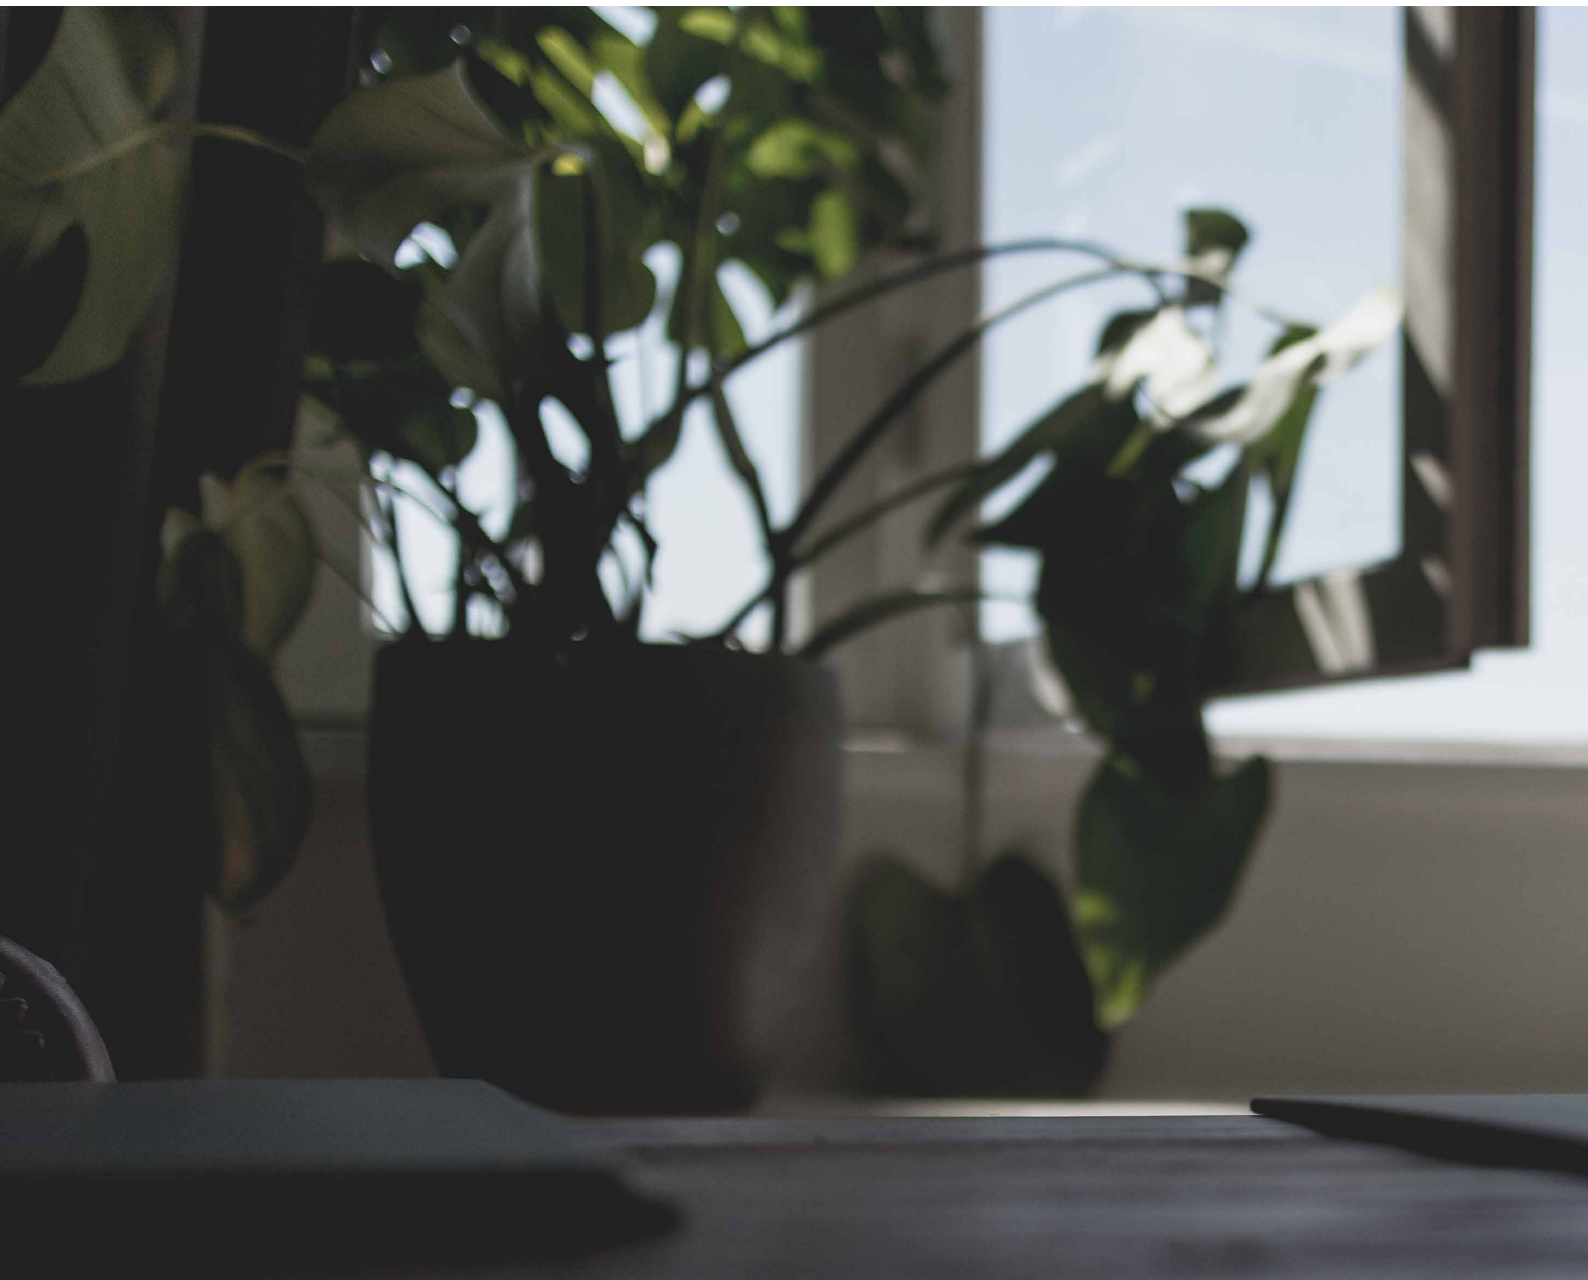

Key Features

- › Multifunctional thermo-hygrometer with colour display
- › 4 measurement results for temperature and humidity
- › Weather trend with air pressure display, time, date and day of the week
- › Incl.: base station, 3x thermometer-hygrometer wireless sensor, power plug, instructions
- › 2 alarm times and snooze function (snooze)

Scope of delivery

Base station
3x thermo/hygrometer wireless sensor
Power plug

Rely on our thermo-hygrometers for consistently accurate readings of your indoor climate. Maintaining optimal temperature and humidity levels is essential for both comfort and health. Whether you're in the bedroom, kitchen, office, or children's room, our practical sets allow you to monitor multiple areas simultaneously. Plus, benefit from additional handy features such as ventilation recommendations, room climate comfort indicators, and mould alerts, making these devices indispensable tools for everyday use. With our thermo-hygrometers, you can ensure a healthy and comfortable indoor environment throughout your home.

THERMO-/HYGROMETER

Expand your horizon

ClimaTemp IO RC Thermometer Jumbo Set

Thermo/hygrometer set of 2 to monitor the indoor climate at up to 5 different locations.

Art. No. 7000013

VentAir Thermo/Hygrometer with touchscreen function and ventilation notification

Improving indoor climate and preventing mould made easy - with this temperature and humidity meter with ventilation recommendation.

Art. No. 7007402

ClimaTemp Hygro Indicator Thermo/Hygrometer Set of 6

6 hygro indicators to control the indoor climate.

Art. No. 7000015CM3000
(black)

Art. No. 7000015GYE000
(white)

Art. No. 7000015QT5000

(anthracite)

Climate Smile Thermo/Hygrometer Set of 2

Twice as good for your indoor climate: the two thermometers/hygrometers include comfort indicator allow you to keep track of the temperature and humidity in two rooms at the same time.

Art. No. 7000017

Climate Monitor Thermometer/Hygrometer DCF Set of 3

Three times as good for your indoor climate The thermometer/hygrometer set include comfort indicator allows you to keep track of the temperature and humidity in three rooms at the same time.

Art. No. 7000016GYE000
(white)

Art. No. 7000016CM3000
(black)

Tempy Thermo-Hygrometer Set of 3

Perfect for a quick indoor climate check: 3 super compact thermo-hygrometers with comfort indicator.

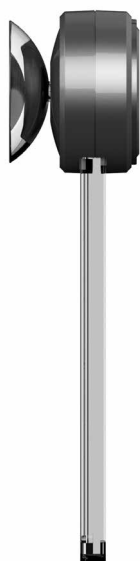

Art. No. 7000050

Window Thermometer Translucidus WT

Clear view on temperature: The window thermometer displays the outdoor temperature on a transparent screen and is effortlessly mounted.

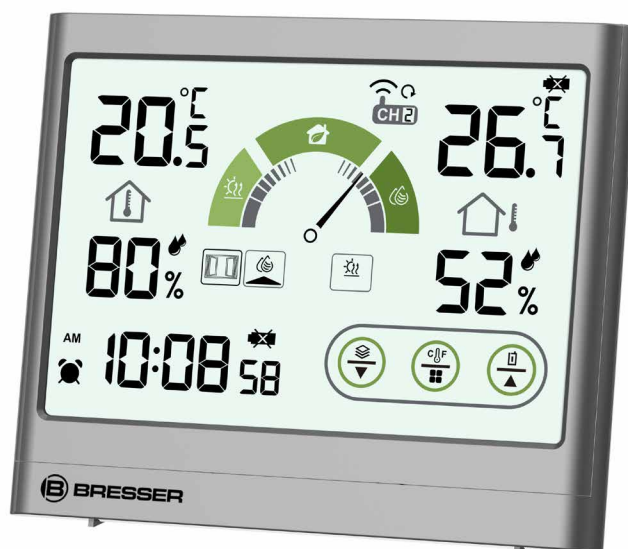

Art. No. 7030110

Thermo-Hygrometer with Ventilation Recommendation VentAir H

Quickly improve your indoor climate: The precise thermo-hygrometer with comfort indicator and value memory shows you when it's time to ventilate. Indicator and value memory, shows you when it is time to ventilate.

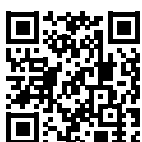

Art. No. 7007403

Thermo-Hygrometer with Ventilation Recommendation VentAir V

This precise thermo-hygrometer with comfort indicator and memory function, lets you know when it's time to ventilate.

Art. No. 7007404

Thermo-Hygrometer with Mould Alert

Compact indoor climate manager for your home: measures humidity and temperature, alerting to risks of mould and overheating!

Art. No. 7007420

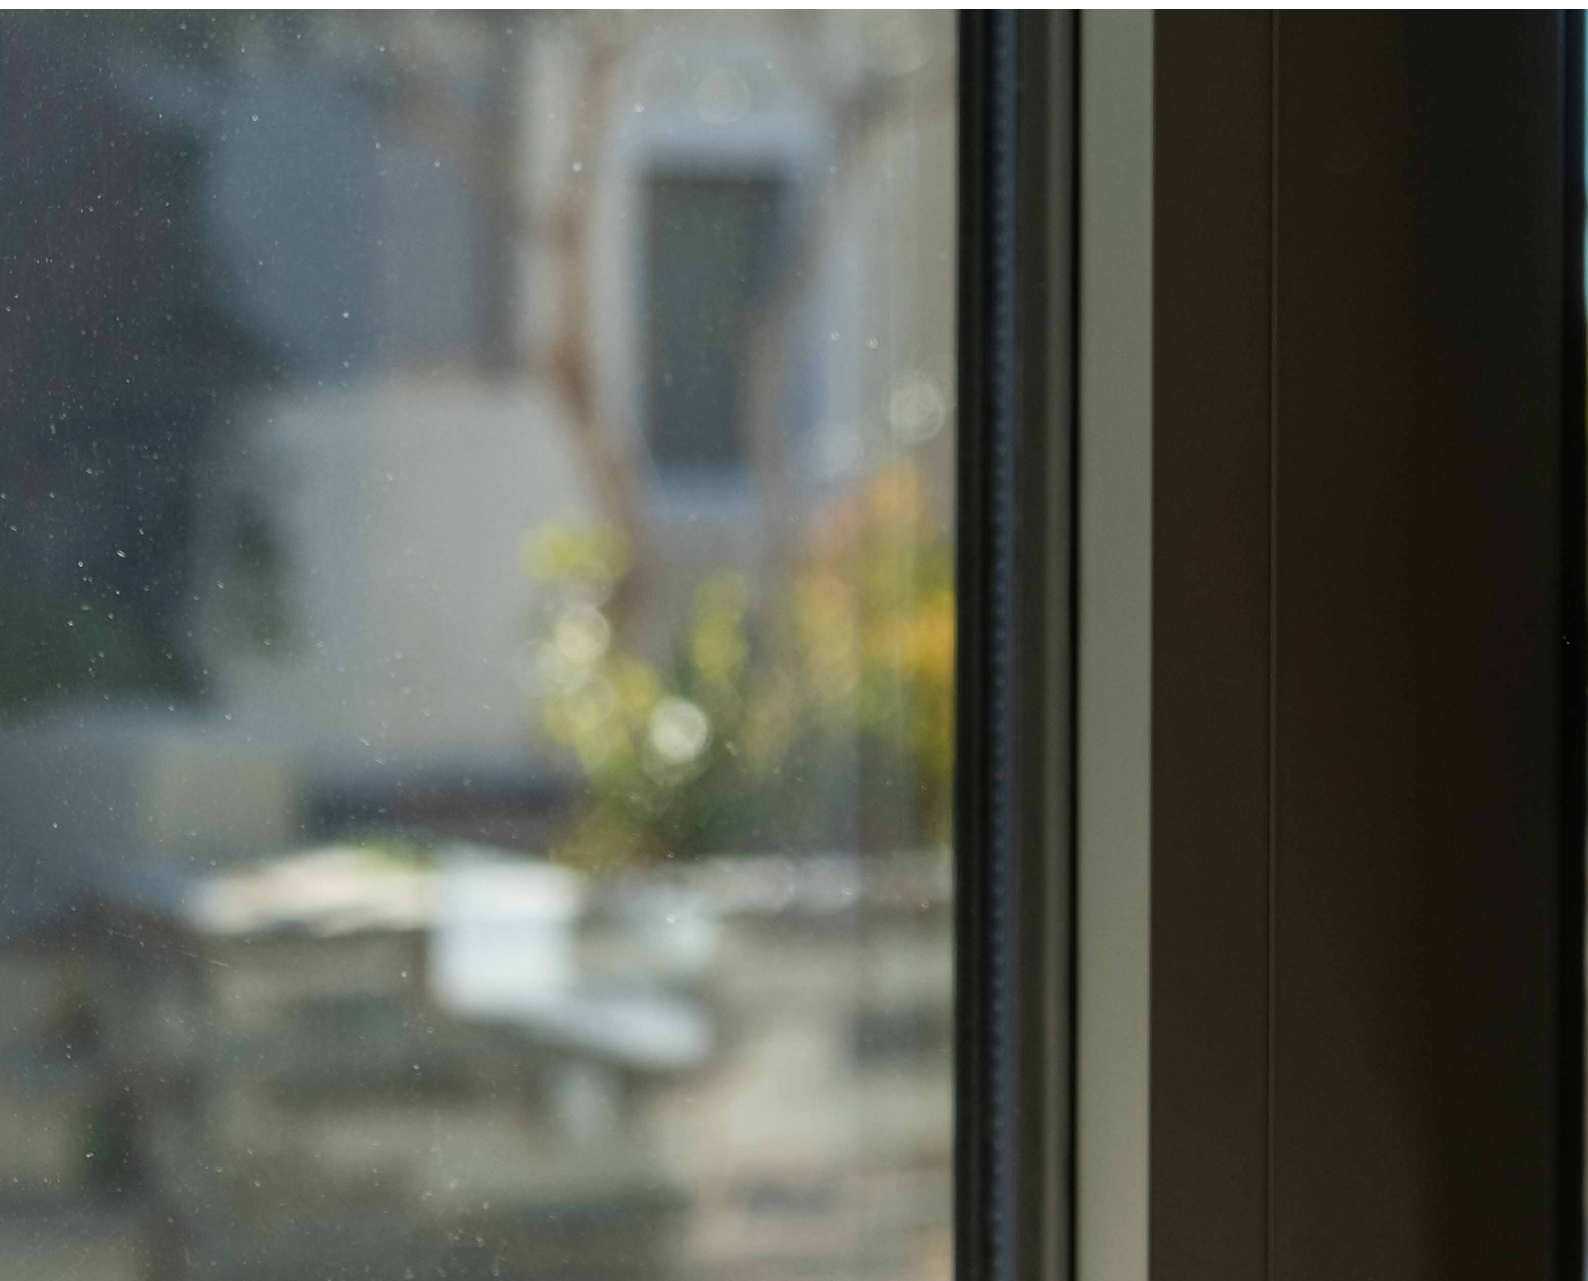

Smile Thermo/Hygrometer Set of 5

Keep an eye on the indoor climate: these thermometer/hygrometer sensors can help to prevent mould and excessively dry air in up to 5 different rooms.

Art. No. 7000040

Invisible yet impactful: excessive amounts of particulate matter and CO₂ can make life difficult. Our air quality monitors are here to help, providing precise data so that you can make sure your rooms are well-ventilated. They come equipped with useful features like an air quality index, a CO₂ indicator, or a data logger for easy analysis. Their sleek design seamlessly integrates into any home or office setting, allowing you to breathe easy.

CO₂ AIR QUALITY MONITORS

Expand your horizon

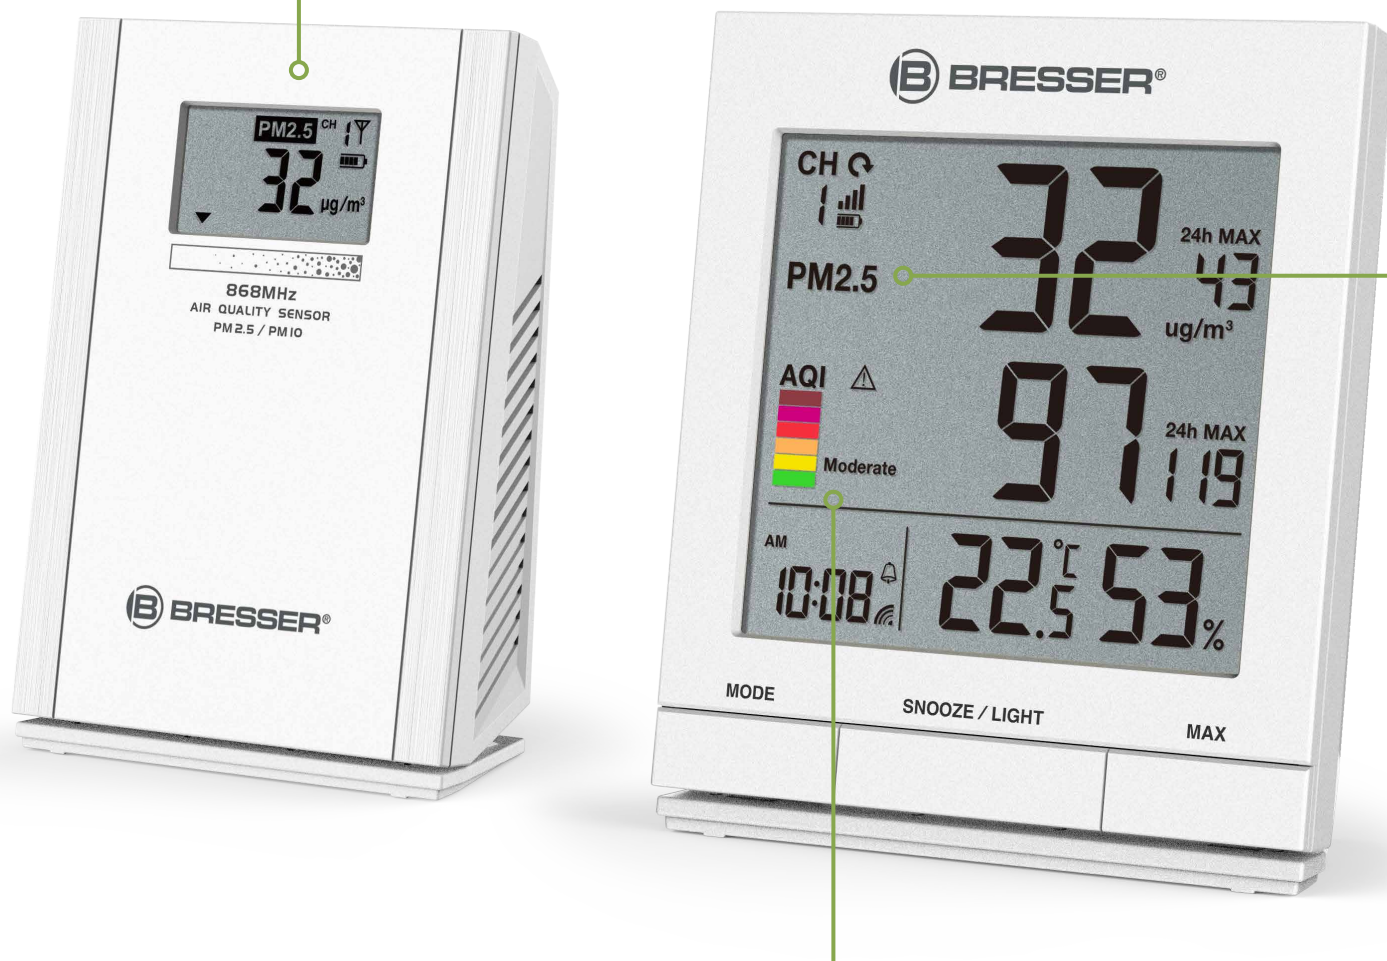

Art. No. 7110300

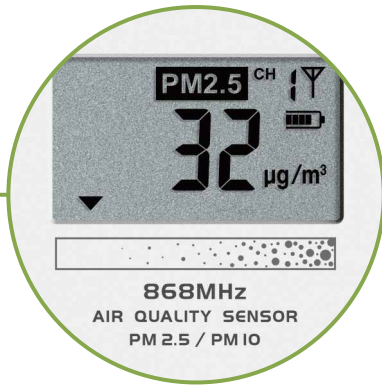

PM2.5 / PM10 Particulate meter with wireless sensor

Breathe easily with the fine dust meter which includes radio sensor, hi-alarm function and hygro-thermometer/thermometer.

Art. No. 7110300

Sensor for measuring particulate matter content from Sensirion

The excellent sensor from renowned Swiss manufacturer Sensirion guarantees very precise measurement results.

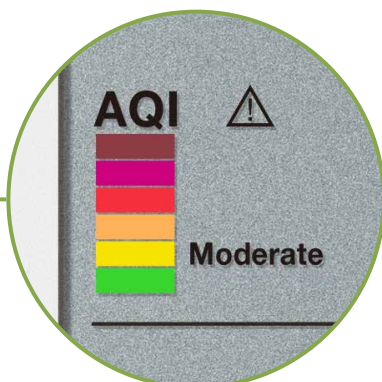

Key Features

- › Highly accurate air quality monitor for precise measurement of particulate matter
- › PM2.5/PM10 air quality index (AQI) with colour coding, ideal for people with allergies
- › Swiss precision technology: sensor for measuring particulate matter by Sensirion
- › High alarm function
- › Records maximum values (1 hour, 24 hours, total)
- › Alarm function with snooze button
- › Installation: Wall or stand
- › Measurement of indoor temperature and humidity

Accurate particulate matter measurement

The radio sensor of the particulate matter meter measures exposure to two types of health-relevant particulate matter: particles with a diameter of less than 10 µm (PM10) and less than 2.5 µm (PM2.5).

Air quality index

The Air Quality Index (AQI) shows you in 6 colour-coded steps whether your air is pure.

Scope of delivery

Base station
PM2.5/PM10 wireless sensor
3x rechargeable AA batteries
USB cable

CO₂ measuring device Smile XXL with traffic lights and extra-large LED display

Indoor air meter with CO₂ traffic light and extra-large screen. Ideal for controlling domestic air quality by measuring CO₂, humidity and temperature.

Art. No. 7004030

CO₂ monitor with data logger for air quality control INV

Monitoring and control of domestic air quality through measurement of CO₂ load, air humidity and temperature; all measured values are saved and can be evaluated on a PC.

Art. No. 7004040

CO₂ Air Quality Monitor Smile

Air quality meter with CO₂ light to regulate home air quality by measuring CO₂ load, humidity and temperature. Effectively warns of the risk of mould and heat!

Art. No. 7004020CM3000
(black)

Art. No. 7004020GYE000
(white)

Art. No. 7004020QT5000
(grey)

Scope of delivery

CO₂ Meter
Power plug

Key Features

- › Very precise carbon dioxide meter with temperature and humidity
- › With a practical CO₂ light, high resolution and fast response time
- › Useful features: carbon dioxide, humidity alarm, memory function
- › Power supply via mains adapter, long continuous operation possible

Clever technology for maximum living comfort: This is how our smart weather stations make your life easier! Perfectly connected, they control all smart devices in your home. Of course, always based on your local weather measurement data. You will automatically enjoy a healthy indoor climate, a cosy atmosphere and your own green garden oasis. Absolutely up-to-date: App and voice assistant keep you meteorologically up to date always and everywhere.

SMART STATIONS

Expand your horizon

Weather now very clever, with your own SmartHome

In today's interconnected world, connectivity is key - even when it comes to monitoring wind and weather. Popular platforms like ProweatherLive, Weather Underground, Weathercloud, AWEKAS, and PWS are supported by various weather stations, enabling you to access local measurement data from your WIFI weather center anywhere in the world.

Picture this: you're on holiday, soaking up the sun, but the well-being of your beloved garden is still on your mind. With just a quick check online, you can stay updated on the weather situation and take timely measures to protect your garden, perhaps even asking neighbours or friends for assistance.

But what if your home could manage these tasks on its own? Enter the realm of Smart Home technology. By integrating your weather station with platforms like AWEKAS, you can seamlessly transfer measurement data such as temperature, humidity, wind strength, and precipitation directly to your smart home control system. Imagine your lawn sprinkler automatically activating when the lawn is thirsty, or returning home to find your living space at the perfect temperature for relaxation after work. With these advancements, you can truly enjoy the benefits of a connected and automated home environment.

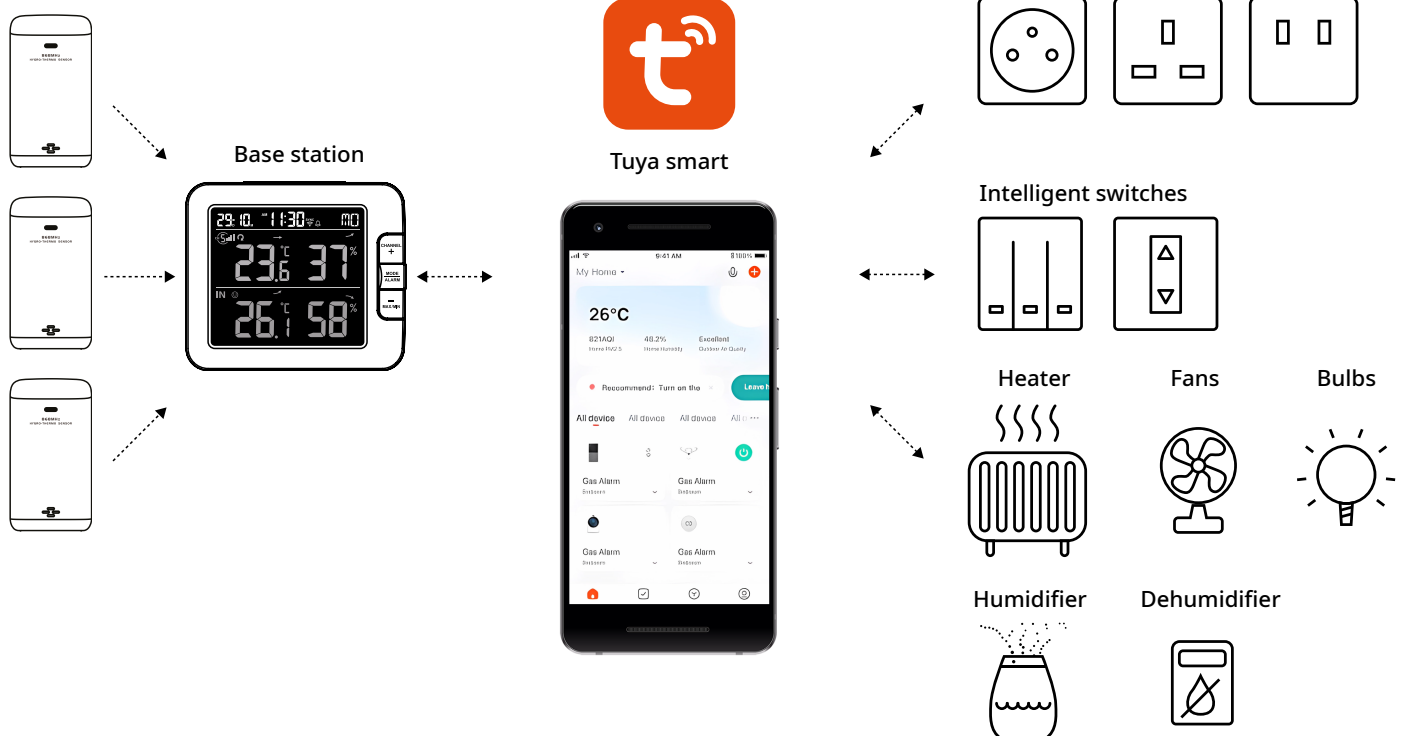

Compatible apps:

Tuya smart

Smart Life

The Tuya Smart app

With the Tuya Smart app, your Tuya Smart devices can do more than just communicate with each other - they can also keep you informed about the air quality. You can easily access the current measurement data of your Smart Thermometer and Hygrometer anytime, anywhere using your smartphone. For those who like to take a more long-term approach to monitoring room climate, you can conveniently upload historical data into the app as well.

In the app's display, you'll see the air quality curve presented as a graph, with the option to view daily, monthly, or annual measured values as desired. This comprehensive view allows you to track trends and make informed decisions about maintaining a healthy indoor environment.

Tuya Smart App Download

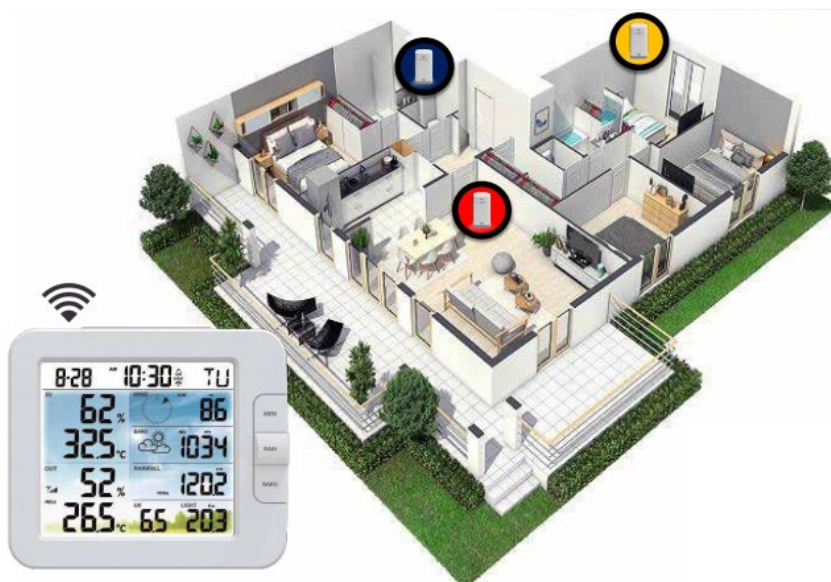

Control other compatible SmartDevices

- › Automatically turn the heating on or off.
- › Automatically turn the air conditioning on or off.
- › Automatic control of humidifiers or dehumidifiers to improve the indoor climate.

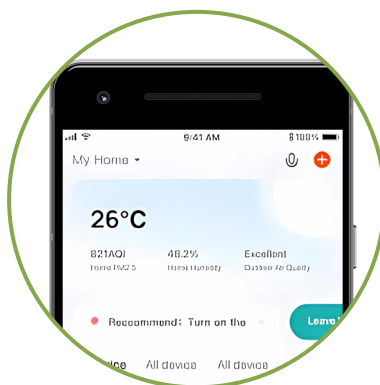

Placement of sensors in multiple rooms

- › A 7-in-1 sensor outside and e.g. up to 3 thermo/hygro sensors in the house.

BRESSER Tuya Smart Thermo- / Hygrometer

Intelligent solution for clever fresh air fans: With the thermo-hygrometer including outdoor sensor, you can now control your indoor climate in a very smart way.

Tuya Smart App

With the Tuya Smart app, it's easy to create a perfectly connected smart home. Access the current measurement data of your Smart Thermometer and Hygrometer anytime and anywhere via smartphone.

Art. No. 7006300

Key Features

- › Smart Thermo-Hygrometer for Tuya Smart Homes
- › Can control other Tuya-compatible IoT devices
- › Controllable via Tuya Smart app
- › Indoor climate indicator
- › Google Assistant / Alexa compatible

Colour LC display

Large, colour LC display for easy reading

Tuya smart home to control other IoT devices

This smart thermo-hygrometer fits perfectly into the system of global market leader Tuya. This makes it easy to turn your home into a perfectly connected smart home using the Tuya Smart App.

Scope of delivery

Smart Thermo-/Hygrometer
Wireless Thermo-hygrometer sensor
Mains adapter

To the perfect garden in no time at all: With the weather stations, water timer and soil sensor from our SmartGarden line, your own little paradise now takes care of itself. For this, the modern devices are integrated into your smart home control at lightning speed. The water then only flows when lawns, flowers and trees really need it – automatically!

SMART GARDEN

Expand your horizon

Smart home watering system

Smart garden aid — with the smart system including weather station, water timer and soil sensor, you can easily optimise plant irrigation.

Weather station including thermo-hygro sensor

Weather station with extensive information including weather forecast with probability of rain, frost alarm, room climate indicator.

Art. No. 7510100

Key Features

- › Smart home system for automatic garden irrigation
- › Controllable via the homgar app, Amazon Alexa and Google Assistant
- › Irrigation based on individual plans and soil sensor measurements*; two modes: irrigation, fog
- › Weather station with extensive information including weather forecast with probability of rain, frost alarm, room climate indicator
- › Soil sensor with LED humidity level display

Smart irrigation system

In the homgar app, you can easily set up to six irrigation plans per day. The smart water time clock then automatically turns the water on and off again at the desired time.

Scope of delivery

Weather station
Water timer - 1 zone
Soil sensor
Thermo-/Hygrometer

Power supply

Mains adapter (Station) (Backup: 3x AA batteries),
4x AA batteries (irrigation clock),
2x AA batteries (thermo-hygrometer),
3x AAA batteries (soil sensor)

Soil sensor

Measurement of soil moisture and temperature

Smart home watering system duo

Garden maintenance made easy — with the Smart home watering system duo. This includes a 2-way water timer and soil sensor, offering completely automatic plant irrigation.

Art. No. 7510200

Key Features

- › Smart home system with 2 connections for automatic garden irrigation
- › Controllable via the homgar app, Amazon Alexa and Google Assistant
- › Irrigation based on individual plans and soil sensor measurements*; 2 modes: irrigation, fog
- › Weather station with extensive information including weather forecast with probability of rain, frost alarm, room climate indicator
- › Soil sensor with LED humidity level display
- › WIFI frequency: 2.4GHz

Scope of delivery

Weather station
Water timer - 2 zones
Soil sensor
Thermo-/Hygrometer

Irrigation clock for 7510100/7510200

Water flows, completely automatically via app: With the water timer for your smart home, you can optimally water your garden and save water, money and time.

Art. No. 7910100

Key Features

- › Smart water timer for BRESSER Smart Garden systems for garden irrigation (7510100/7510200)
- › Controllable via the homgar app; suitable for voice control with Alexa and Google Assistant
- › Up to 6 irrigation plans per day can be defined; 2 operating modes to choose from: Irrigation and fog; range: 60 m
- › Pause of irrigation plans for 24 hours can be set via app
- › Statistics on daily and monthly water consumption available via app

Scope of delivery

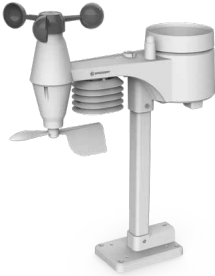

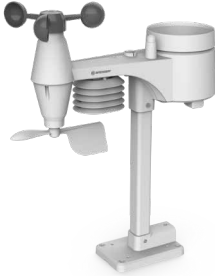

Water timer - 1 zone

Company

The "BRESSER Group of Companies" with more than 1,000 employees worldwide and headquarters in Germany combines development, production, sales, marketing and customer service under one roof. Our employees are enthusiastic observers of nature and share the enthusiasm for optical products. Fair, user-oriented advice and committed customer service are our top priorities.

Quality

With decades of experience and state-of-the-art technology, we offer high quality at a low price. Numerous satisfied customers confirm this every day.

Customer service

Before and after the purchase - we at BRESSER will find the right solution for you! If you have any questions or problems with one of our products, our customer advisors in Rhede, North Rhine-Westphalia (Münsterland) will be happy to help you.

We do not leave you alone after the purchase and attach great importance to customer-oriented service, which also includes a long-term guaranteed supply of spare parts.

Product diversity

Traditionally, the product range at BRESSER is very broad. Whether binoculars, spotting scopes, monoculars, night vision devices, rangefinders, rifle scopes, game cameras, action cams or tripods from beginner to professional, we offer everything from one source.
